REPORTER'S RECORD
VOLUME 52 OF 57 VOLUMES

TRIAL COURT CAUSE NO. F09-59380-S
CASE NO. AP-76,458

THE STATE OF TEXAS : IN THE 282ND JUDICIAL
VS. : DISTRICT COURT OF
GARY GREEN : DALLAS COUNTY, TEXAS

PUNISHMENT PHASE BY JURY

On the 4th day of November, 2010, the following
proceedings came on to be heard in the above-entitled and
numbered cause before the Honorable Andy Chatham, Judge
Presiding, held in Dallas, Dallas County, Texas:
Proceedings reported by machine shorthand computer
assisted transcription.

PROCEEDINGS

1 THE COURT: Everybody ready?

2 MR. BEACH: Yes.

3 MR. JOHNSON: Yes, Judge.

4 (Discussion off the record.)

5 THE COURT: No. Bring them in. We'll take them

6 after you're done.

7 MR. JOHNSON: Okay.

8 THE COURT: Yeah, bring them in.

9 THE BAILIFF: All rise.

10 (Jury returned to courtroom.)

11 THE COURT: Thank you all. Please be seated.

12 Please call your next witness.

13 MR. JOHNSON: Call Dr. Gilbert Martinez.

14 THE COURT: Doctor, if you would.

15 (Witness brought forward and sworn.)

16 THE COURT: Please have a seat.

17 THE WITNESS: Thank you.

18 GILBERT MARTINEZ,

19 was called as a witness by the Defendant, and after having been

20 first duly sworn, testified as follows:

21 DIRECT EXAMINATION

22 BY MR. JOHNSON:

23 Q. Would you state your name, please.

24 A. My name is Dr. Gilbert Martinez.

1 Q. Dr. Martinez, where do you live?

2 A. I live in the community of Boerne outside of San

3 Antonio, Texas.

4 Q. Okay. And, sir, how old a man are you?

5 A. Forty-five years old.

6 Q. How are you employed?

7 A. I am the director and owner of South Texas

8 Neuropsychological Associates. It's a practice that provides

9 neuropsychological and psychological services in the San

10 Antonio area and South Texas.

11 Q. Okay. And could you tell the jury about your

12 education and your background and training that enables you to

13 hold that position?

14 A. Yes, I have a Bachelor's degree in Psychology and

15 Zoology from the University of Texas at Austin. I have a

16 Master's and a Ph.D. in Clinical Neuropsychology from the

17 University of Houston. I'm a licensed psychologist in the

18 State of Texas, and I have extensive training and experience in

19 evaluating and treating all different types of cognitive,

20 mental, and behavioral disorders. I -- in addition to my

21 private practice, I also have a contract with the Veterans

22 Administration and regularly evaluate veterans and -- and

23 enlisted soldiers. I am also a -- an oral examiner with the

24 state board where I evaluate individuals that are seeking

25 licensure as psychologists in the State of Texas. I am a staff

1 neuropsychologist with two hospital systems in San Antonio,

2 including the Health South Hospital System and the Nix Health

3 Care System. And we routinely conduct about -- anywhere from

4 400 to 600 psychological assessments during -- per year in my

5 practice.

6 Q. When you say that you've performed these clinical

7 assessments, can you give the jury a little bit of an idea what

8 it is that you actually do?

9 A. Yes. I'm a clinical neuropsychologist, so I'm

10 commonly asked to evaluate a person's mental functioning. Many

11 times these are people that suffer from neurological

12 conditions, like head injuries or strokes or things like that,

13 or they suffer from emotional problems like depression or

14 bipolar disorder. And -- and I am a consultant where I -- when

15 a patient is referred to us, we administer a broad range of

16 psychological and neuropsychological tests. These are

17 standardized tests that are designed to tell us at what level a

18 person is functioning and what kinds of emotional and cognitive

19 and mental problems they might be having.

20 Q. What is the -- when -- you use the term

21 "psychological," as well as "neuropsychological." Could you

22 tell the jury what the distinction is that you draw between the

23 two?

24 A. Yes. Psychological is a more general term that

25 refers to a lot of different aspects of a person's mental and

1 emotional functioning and behavioral functioning. Whereas

2 neuropsychological refers more specifically to evaluating brain

3 behavior relationships, relationships between what's going on

4 with the person emotionally and behaviorally as it relates to

5 their brain function. A clinical neuropsychologist typically

6 will have all the training of a clinical psychologist and they

7 have to be licensed in the same way as clinical -- as a

8 psychologist with the State of Texas, but then they also have

9 extra training and experience in working with brain-related

10 disorders, as well.

11 Q. And is one of the aspects of your practice, is that

12 also consulting and -- with both -- both prosecutors and

13 defense attorneys in regards to performing analysis and

14 diagnoses on individuals?

15 A. Yes.

16 Q. Okay. And when you are called upon by either the

17 prosecutor or a -- or a defense attorney to do this, what kind

18 of methodologies do you use to perform these analyses?

19 A. We -- we administer standardized psychological and

20 neuropsychological tests. These are tests that are designed to

21 evaluate a person's memory, their verbal memory, their visual

22 memory, tests that are designed to evaluate a person's

23 intelligence level. We give tests that look at verbal

24 intelligence and non-verbal intelligence, tests that are

25 designed to evaluate a person's academic achievement, where

1 they fail academically in respect to -- with respect to their
2 abilities and -- and make comparisons with that -- with
3 intelligence and -- and other factors. And then we also give
4 standardized tests that are designed to evaluate a person's
5 emotional functioning. We -- we give tests that are designed
6 to evaluate whether a person might suffer from things like
7 depression or schizophrenia or problems with thought or other
8 problems with behavior or personality.

9 And we use different sources of information.
10 We -- we try to get as much medical history and personal
11 history as we can, both from the patient and then from other
12 medical records that are available. And then we also, of
13 course, use a data gathered from our psychological tests, and
14 then we also form clinical impressions of the patient by
15 spending time with them and interviewing them and looking for
16 certain characteristics that meet symptomatic criteria.

17 Q. And how important, Doctor, is it to know that
18 individual's -- or get a -- as clear picture as you can in
19 regards to that person's background and social history?

20 A. We try to get as much social history as we can. The
21 more history that we have for a person, obviously the more
22 accurate our diagnosis is going to be. Oftentimes we don't
23 have as much information as we would like to have, but for the
24 most part, we try to get as much information as we can. The
25 more, the better, so to speak.

10

1 Q. Okay. Could you tell the jury the -- what -- is
2 there any particular testing or tests themselves that you use
3 in doing these neuropsychological exams?

4 A. Yes. I have a standard neuropsychological test
5 battery. Most neuropsychologists will either have a standard
6 battery that they administer to most or all of their patients
7 or they'll have what's called a flexible battery which means
8 that they'll pick and choose different tests. I lean towards a
9 side of using a standard battery that I give to most of my
10 patients, and then sometimes I add or subject tests based on
11 the referral question. But my standard battery includes tests
12 like the Wechsler Memory Scale that evaluates verbal memory. I
13 give subtests of the Wechsler Memory Scale that evaluate verbal
14 memory.

15 I give a test called Rey-Osterrieth Complex
16 Figure that evaluates visual memory. I give the Wechsler Adult
17 Intelligence Scale, Fourth Edition. This is a comprehensive
18 test that's sort of like the gold standard. It's the most
19 widely used test for evaluating intelligence -- both verbal and
20 non-verbal intelligence. I do -- I give tests that are
21 considered academic screening tests that look at a person's
22 reading, writing, and arithmetic abilities. And then I also
23 give tests like a test named the Trail Making Test that looks
24 at mental shifting and information processing speed.

25 We also -- I also use a test called the

1 Wisconsin Card Sorting Test which is a commonly used test to
2 look at a person's ability to -- to plan and learn visually and
3 to shift mentally/visually. And all of these tests are
4 designed to basically look at a person's higher level mental
5 functions. In other words, what level are they functioning at
6 with respect to their -- to -- to their cognitive functioning
7 and their intelligence.

8 And then we also look at -- give tests that are
9 designed to evaluate a person's emotional functioning. I use a
10 personality assessment inventory which is a standardized test
11 that is written, that gives us information about a person's
12 mood and personality and behavior. And I also use other tests
13 sometimes like the sentence completion test, or what I call
14 projective tests where a person draws something or has to look
15 at some pictures.

16 Q. Doctor, these tests that you described, and I don't
17 know -- I don't think I'm going to ask you to describe them
18 again, but the tests that you've described that you use, are
19 those the standard -- or pretty much the standardized testing
20 that are done in -- by clinical psychologists across -- across
21 the land?

22 A. Yes. I -- I tend to lean toward using the most
23 commonly used tests. There's a lot of different tests out
24 there, but these tests are some of the most commonly used
25 tests. I think if you polled psychologists and

12

1 neuropsychologists across the country, you would find that
2 these are probably some of the most commonly used tests, and
3 these are -- this is the same test battery that I routinely use
4 in my everyday clinical practice.

5 Q. And you had mentioned -- you used the term a moment
6 ago as to a "referral question". What are you talking about
7 when you say a referral question?

8 A. One of the -- one of the primary things that -- that
9 an evaluator, a neuropsychological evaluator has to consider
10 before they see a patient is what is the question that's being
11 asked. And sometimes I'm being -- I get asked to evaluate a
12 person's intellectual functioning, for example, what's their
13 intelligence level. Sometimes I get asked to evaluate a
14 person's neuropsychological functioning, and oftentimes I'm
15 asked to do what's called an independent medical examination
16 which is basically an examination that is independent of a
17 person's history where my job basically is to evaluate the
18 person and give my clinical impressions as to what I think is
19 going on with that person at that time without reference to any
20 other records.

21 Other times the referral question involves an
22 extensive review of records, and I do that quite a bit, as
23 well, where I don't actually evaluate the individual, but I
24 review records. So there's sort of a broad range of referral
25 questions. Referral questions typically include issues like,

<p style="text-align: right;">13</p> <p>Case 3:15-cv-02197-M-BH Document 24-57 Filed 08/01/16 Page 8 of 50 PageID 6009</p> <p>1 please let us know what you think about this person's emotional</p> <p>2 functioning. Do they have a mental disorder? Do they have a</p> <p>3 cognitive disorder? Do they have an intellectual disorder?</p> <p>4 And there's different ways of approaching that referral</p> <p>5 question, but basically that's the first thing that a</p> <p>6 neuropsychologist has to consider whenever they get a referral.</p> <p>7 Q. And, Doctor, in this particular case were you asked</p> <p>8 to perform an evaluation on an individual that you've come to</p> <p>9 know as Gary Green?</p> <p>10 A. Yes, I was.</p> <p>11 Q. And is this Mr. Green sitting here to my right?</p> <p>12 A. Yes.</p> <p>13 Q. Now, Doctor, in regards to the referral questions</p> <p>14 that were posed to you in regards to Gary Green, could you tell</p> <p>15 the jury what it was that you were asked to do and what it was</p> <p>16 you were asked to look for with -- in regards to Gary Green?</p> <p>17 A. Yes. With Mr. Green, I was asked to conduct an</p> <p>18 evaluation of -- of his cognitive functioning. In other words,</p> <p>19 I was asked to evaluate his memory, attention, reasoning, and</p> <p>20 judgment, and to provide opinions regarding his level of</p> <p>21 cognitive functioning. I was also asked to evaluate his</p> <p>22 intellectual functioning to determine if he suffered from any</p> <p>23 type of mental retardation or intellectual deficiency. And</p> <p>24 then I was also asked to evaluate his emotional functioning.</p> <p>25 In other words, does he suffer from a mental disorder like</p>	<p style="text-align: right;">15</p> <p>1 the -- his medical records -- and, in fact, his medical records</p> <p>2 in regards to actual past psychiatric or past mental health</p> <p>3 evaluations are pretty scant, aren't they?</p> <p>4 A. Yes. I -- I believe it was about half an inch worth</p> <p>5 of records or something like that.</p> <p>6 Q. Okay. And -- but were those helpful to you?</p> <p>7 A. Yes, they were.</p> <p>8 Q. Did you have an opportunity also to review -- and</p> <p>9 not just review a synopsis of interviews that had been done on</p> <p>10 some of his family members, but did you have -- also have an</p> <p>11 opportunity to interview those people yourself?</p> <p>12 A. Yes, and I apologize, I forgot to mention that. I</p> <p>13 also interviewed Mr. Green's mother and his brother, as well,</p> <p>14 as part of my assessment. And I did have access to records</p> <p>15 regarding some previous interviews that had been done with Mr.</p> <p>16 Green's brother, I believe.</p> <p>17 Q. Okay. Now, in that regard, one of the things that</p> <p>18 we specifically asked you to exclude was going into the actual</p> <p>19 details of the offense of what he's charged with; is that</p> <p>20 correct?</p> <p>21 A. That's correct.</p> <p>22 Q. And as you talked about earlier, you are -- you are</p> <p>23 cur -- you are oftentimes asked to exclude particular pieces of</p> <p>24 information in regards to what effect that may have on the</p> <p>25 diagnoses; is that right?</p>
<p style="text-align: right;">14</p> <p>1 depression or bipolar disorder or even a thought disorder like</p> <p>2 schizophrenia. So I was asked to look at basically the</p> <p>3 clinical aspects of his functioning.</p> <p>4 Q. Okay. And were you able to do so?</p> <p>5 A. Yes, I was.</p> <p>6 Q. Could you tell the jury how it was and what it was</p> <p>7 that you did with Mr. Green that enabled you to formulate the</p> <p>8 opinions that you're going to offer here in the courtroom this</p> <p>9 morning?</p> <p>10 A. Yes. I was -- I was provided access to his</p> <p>11 psychiatric history by way of medical records, so I was</p> <p>12 provided records regarding some of his previous psychological</p> <p>13 and psychiatric evaluations and treatment. And then I traveled</p> <p>14 from San Antonio here to the jail, and I spent the better part</p> <p>15 of a day with Mr. Green. I interviewed him for about two</p> <p>16 hours, and then I administered -- I personally myself</p> <p>17 administered a battery of these psychological and</p> <p>18 neuropsychological tests that I -- that I just mentioned which</p> <p>19 took another five or six hours or so.</p> <p>20 Q. Okay. And in -- is this -- as you've talked about</p> <p>21 earlier, is this pretty much the standard neuropsychological</p> <p>22 diagnoses and testing that is appropriate for this type of</p> <p>23 referral questions?</p> <p>24 A. Yes, it is.</p> <p>25 Q. Other than -- other than talking and reviewing</p>	<p style="text-align: right;">16</p> <p>1 A. That's correct. As I mentioned earlier, it's -- the</p> <p>2 concept is sort of an independent medical exam. I do that a</p> <p>3 lot with insurance companies or with other referral sources</p> <p>4 where a person is referred to me and certain records are</p> <p>5 omitted so that I can form sort of an independent evaluation of</p> <p>6 the person without it being tainted by other aspects of the</p> <p>7 history and so forth.</p> <p>8 Q. Okay. And obviously, you were called upon and</p> <p>9 came -- traveled to the Dallas County Jail to conduct your</p> <p>10 interview process; is that right?</p> <p>11 A. That's correct.</p> <p>12 Q. So you knew the Defendant -- you knew he was charged</p> <p>13 with murder and you knew he was in jail for it?</p> <p>14 A. Correct.</p> <p>15 Q. Could you tell the jury how Gary Green presented</p> <p>16 himself to you when you came to meet him?</p> <p>17 A. Are you asking about what he said initially or what</p> <p>18 his demeanor was?</p> <p>19 Q. His initial appearance to you --</p> <p>20 A. Uh-huh.</p> <p>21 Q. -- and if you could, just describe the -- not</p> <p>22 necessarily the particulars of what he said to you, but could</p> <p>23 you just tell the jury how he appeared emotionally?</p> <p>24 A. Yes, he was -- he was severely depressed and</p> <p>25 despondent. I had to provide considerable effort to get him to</p>

1 answer questions. He tended to look down quite a bit. He was
2 basically in an extreme state of sadness and despondence
3 where -- where his mood was -- was severely depressed and --
4 and his affect -- in other words, his emotional tone, how he
5 presents with his facial expressions and so forth, was very
6 flat. In other words, it was blunted. He had some signs of
7 significant depression.

8 Q. Okay. And -- and did that -- I mean, did it seem
9 unusual or was that somewhat appropriate, considering the
10 circumstances that you found him in?

11 A. Well, I would expect somebody to have depression
12 when I -- when they're in -- in the prison system and they're
13 being charged with a capital crime, although I will have to say
14 that I have evaluated other individuals in similar
15 circumstances who did not suffer from depression.

16 Q. Okay. And when you conducted your clinical analysis
17 of Gary Green, you said you spent a few hours that were
18 involved just in your clinical diagnoses that didn't really
19 involve the actual neuropsychological testing; is that right?

20 A. That is correct.

21 Q. Neuropsychological testing is going to tell you
22 about the brain function; is that right?

23 A. That's correct.

24 Q. And these are -- these are interrelated, but they're
25 a little bit different than just the mental and thought aspects

18

1 that you're looking at; is that right?

2 A. That is correct. There -- there are different
3 sources of information. My clinical interview provides me
4 information about how the person appears, how they think about
5 themselves, how they think about their lives and their
6 problems, by me asking the person questions and then observing
7 their -- their body language and their demeanor and their
8 behavior clinically. And a psychologist obviously has training
9 in doing that. The psychological testing is a -- is a
10 standardized way of trying to measure a person's abilities,
11 what it is that they're able to do and at what level they're
12 functioning at.

13 Q. Even though Gary Green was extremely depressed and
14 despondent when you were meeting with him, was he cooperative
15 with you -- throughout the interview and the testing process?

16 A. Yes, he was.

17 Q. Could you describe whether or not in this testing
18 process that you used for the neuropsych are there measures
19 that are evaluate -- or evaluational measures in the testing
20 themselves to give you a degree of confidence in the results
21 that you are getting?

22 A. Yes. We use -- we use different techniques to try
23 to figure out whether the person is actually putting forth
24 their best effort, for example. So I gave a test called the
25 Test of Memory Malingering that is designed to evaluate whether

1 a person is trying hard enough and whether they're putting
2 forth their best effort, whether they have anything that's
3 called -- referred to as response bias, which is a term
4 basically for how hard somebody is trying and whether they're
5 putting forth as much effort as they should. And then I also
6 gave a test that's designed to evaluate whether a person is
7 over reporting their symptoms. In other words, is a person
8 telling me a lot of things that are unusual or unreasonable
9 based on what -- how he appears clinically. And these tests
10 give us some information as to whether a person is able to --
11 whether a person is -- is making any kind of an attempt to
12 misrepresent their problems or their symptoms or -- or their
13 cognitive ability.

14 Q. And can you tell the jury if the Defendant and his
15 performance on those evaluation techniques there for confidence
16 level, did he perform within the acceptable levels that gave
17 you confidence in the results that you got across the board?

18 A. On the -- on the cognitive test, he performed well
19 within the acceptable levels. And I didn't see any other
20 evidence or problems with cognitive -- with his cognitive
21 testing, so on the cognitive testing he did perform within
22 acceptable levels.

23 On the testing of reporting of emotional
24 symptoms, he had a tendency to record a lot of symptoms related
25 to depression and -- and to other aspects -- other problems

20

1 with mental functioning which, in my opinion, is consistent
2 with his clinical presentation since he was so severely
3 despondent. So in other words, he was endorsing a lot of
4 symptoms with depression which is consistent with what I was
5 seeing him -- seeing in him.

6 Q. Could you tell me, in regards to the cognitive
7 aspects of the testing that you did -- and when you use the
8 word "cognitive," break that down into something simple. What
9 do you mean when you talk about cognitive functioning?

10 A. Memory, attention, and reasoning.

11 Q. Okay. Now, are these -- when you're testing for
12 these cognitive issues, are you testing to determine
13 something about the person's intellectual level?

14 A. Yes. Cognitive is actually a little different than
15 intellectual, but they're related. They're both kind of the
16 same thing, but -- but intellectual is basically a person's
17 intelligence level, and that includes an evaluation of what
18 they know and how well they know this, in addition to how well
19 they can function and solve problems and think. Whereas, the
20 term "cognitive" refers more specific to specific aspects of
21 mental functioning, like your ability to store and retrieve
22 information or your ability to focus your attention on a task.

23 So they're related, but I gave certain tests
24 that were designed to look at his cognitive functioning, which
25 is his memory and his attention and thinking. And then I gave

21
 1 other tests that were designed to evaluate his intellectual
 2 functioning, his intelligence. And even though they're similar
 3 in -- in neuropsychological testing, they're sort of considered
 4 as different things.
 5 Q. Were you able throughout these -- this comprehensive
 6 testing, does this able you to come up with what we talk about
 7 when we're talking about a full -- full scale intelligence
 8 score?
 9 A. Yes, it does.
 10 Q. What does the full scale intelligence score tell you
 11 about an individual?
 12 A. A full scale intelligence score is a way of
 13 classifying where the individual falls in -- in the population
 14 with respect to his intelligence level. So basically it's the
 15 I.Q. score. It tells us where he falls in relation to
 16 everybody else in the population. It has an average of a
 17 hundred, and then there's certain cutoffs for what we would
 18 consider average and low average and so forth. For example, 90
 19 to 109 is within the average range; 80 to 89 is low average; 70
 20 to 79 is borderline; and 69 and below is generally considered
 21 to be in the extremely low or mental retardation range.
 22 Q. Okay. And can you tell the jury what -- what you
 23 found to be -- Gary Green's intelligence level or I.Q. level?
 24 A. Yes. Mr. Green's I.Q. level was hovering right
 25 around the upper end of the borderline range and the lower end

22
 1 of the low average range, so his I.Q. -- I think his full
 2 scale I.Q. was -- I think -- I believe it was a 78 or a 79,
 3 which is -- which is sort of -- let's see here, let me just
 4 confirm that. But his I.Q. -- his full scale was a 78, which
 5 places him in the upper end of the borderline range. So in
 6 other words, he's not -- his I.Q. was not average. It wasn't
 7 even really low average, although it's hovering pretty close to
 8 there. It was in the upper end of the borderline range.
 9 Q. And could you tell the jury briefly what you found
 10 out in regards to the cognitive aspects of the testing?
 11 A. Yes. On the cognitive aspects of the testing,
 12 basically he didn't seem to have any real severe memory
 13 problems, but he did have some attentional problems. In other
 14 words, he did have some difficulty focusing on tasks, and these
 15 attentional problems caused some inconsistency in his scores
 16 where there was some scores that were in the normal range and
 17 some scores that were a little bit below normal. But I didn't
 18 really find a lot of evidence for a severe cognitive
 19 disturbance like what you typically see with somebody who has a
 20 lot of brain damage or a head injury or something like that.
 21 And I did find that he did have some difficulty,
 22 too, with what's called higher level thinking or higher level
 23 mental functioning. On one of the tests that I gave him, the
 24 Wisconsin Card Sorting Test --
 25 COURT REPORTER: I'm sorry, one more time.

23
 1 A. The Wisconsin Card Sorting Test. I apologize. I'm
 2 probably talking a little too fast. On the Wisconsin Card
 3 Sorting Test, he -- he did have quite a bit of difficulty
 4 with -- with learning and mental shifting which is consistent
 5 with his -- with his lower I.Q. scores.
 6 Q. In regards to the -- his percentile of how he would
 7 fall in the population, could you tell the jury about what
 8 range in regard to his cognitive functioning he would fall in,
 9 as regards to the scale of normality?
 10 A. I would say if I had -- if I had to dis -- to put
 11 one label on it, it would be more or less the low average
 12 range, if you took all the -- all the test results altogether.
 13 There were some areas of impairment, but I think it was
 14 attentional, so -- so his -- his cognitive functioning was
 15 pretty consistent with his intelligence which is sort of low
 16 average to borderline.
 17 Q. His percentile rank -- what did you assign him in
 18 regards to his percentile ranking for the population?
 19 A. Well, for -- for the cognitive functioning, we gave
 20 a lot of different tests, and so there isn't a specific
 21 percentile rank.
 22 Q. I'm just going by the full -- his full scale I.Q.
 23 A. Oh, his full scale I.Q. score was a 78. And -- and
 24 so his percentile rank there is a seven, which basically means
 25 that -- that out of every hundred people he would theoretically

24
 1 do better than seven of them. And 93 of them would do better
 2 than he would.
 3 Q. Okay. And -- and so when you're talking about 93
 4 out of a hundred people are going to have a higher cognitive
 5 and full -- and I.Q., than you, you're -- and you even -- when
 6 you say that's low average, I mean, that sounds awfully low,
 7 does it not?
 8 A. It's -- it's pretty low in the population, compared
 9 to the population. And -- and this is -- this is actually just
 10 focused on -- that particular score is just focused on
 11 intelligence, but it is lower. You know, as I mentioned
 12 earlier, it's definitely not within average. And -- and it's
 13 actually hovering on -- on lower than low average. So it's
 14 sort of like a -- in the borderline range. A lot of people
 15 refer to this as borderline impaired. And -- and sort of like
 16 a step above mental retardation, but individuals with this
 17 level of intellectual functioning, they can usually function
 18 independently, but they will have some difficulty understanding
 19 complicated information. They may have difficulty with complex
 20 things like -- like managing their finances if things get
 21 complicated or -- or keeping track of complicated information
 22 in their personal lives, but they can usually function on their
 23 own.
 24 Q. Did you discover the presence of any formal learning
 25 disability?

A. No, I did not.

Q. And when I asked you about a learning disability, what is -- what are typically known as learning disabilities?

A. A learning -- a learning disability by definition is defined as a difficulty in acquiring information in a certain area where there is a decrease in scores between intelligence test scores and academic test scores. So in other words, most school systems will consider a -- a difference in 15 points between intelligence test scores and academic ability test scores to signify a learning disability.

If somebody has learning problems because of intelligence, then -- then basically the learning problems can be attributed to their low intelligence level. But if somebody has a high intelligence level and they have real low math scores or low reading scores or low spelling scores, then we start to -- to consider the possibility that they have a real specific learning disability -- it's called a formal learning disability -- in a particular area that's not due to problems with intelligence.

Now, what ends up happening, as -- as the school psychologist spoke to yesterday, is that there are a lot of other factors that come into play, like emotional functioning and things like that. But for the most part, that's what a learning disability refers to.

Q. Okay. And the point I would like to make or ask you

about here, you were present yesterday. In fact, like -- again, you were able to sit in through -- yesterday throughout the presentation of the family members and through the school psychologist; is that right?

A. That's correct.

Q. And Dr. Gray-Smith told this jury that through her evaluation of his history, as far as academic achievement and testing, that he was -- he was basically chronic in academic failure?

A. That's correct.

Q. And she told this jury that that would be looked at to be determining whether it was due to a disability in a learning -- a formal learning disability or whether or not it was a result of mental disorder; is that correct?

A. I believe that's what she was talking about, as well, yes.

Q. And are -- so you're here to tell the jury that through your testing, you have ruled out a formal learning disability?

A. Yes. With a test score, what happens is -- a person who has chronic academic underachievement -- in other words, they do poorly in school their whole lives, they don't develop well academically, and they also don't develop well intellectually. It's difficult to -- to say too much about whether one causes the other or how they contribute to each

other, but in Mr. Green's case, for example, he had low scores on intelligence tests and he had low scores on academic tests. And so what we're looking at in Mr. Green's case is a person who has the low average intellectual functioning and academic functioning together. So that sets the stage for a pattern of chronic academic under achievement and personal under achievement.

And then, I think to -- to answer your question, emotional problems and mental disorders definitely, as a -- as they coexist with these issues come into play whereas the academic and intellectual problems contribute to the emotional problems, and the emotional problems also contribute to the academic and intellectual problems, so it all develops together in a person.

Q. Now, Doctor, I want to move you to the area of the actual mental diagnosis or the evaluation that -- and I think as you just said, you really can't separate the intellect from -- I mean that aspect from the mental part; is that correct?

A. It's difficult to do, yes.

Q. Okay. But as far as for purposes of the actually coming in and making a diagnosis in regards to mood and thought disorders or mental disorders, can you tell the jury what the difference is between that? What's the difference between a mental illness, and what's the difference as opposed -- or just

a behavioral disorder?

A. Yes. A mental illness is -- refers basically to -- to a disorder of either emotional functioning, which is mood, or thought. So a disorder of mood or thought is presumed to be due to sort of an imbalance in the brain functioning somehow. There's a lot of evidence that's coming out now in different -- different lines of research that show that people with severe depressive disorders, for example, or with thought disorders like schizophrenia, they actually have criminal imbalances and -- and changes in metabolism in different parts of their brain. And -- and there's evidence coming out now that these start to happen at a very early age in a person's life. And then as time goes on, they develop into more chronic conditions. Those are mental disorders -- disorders of mood and thought.

Personality disorders are usually coded on another axis on the DSM-IV which is our diagnostic and statistical manual, and those refer to problems with interpersonal behavior. These are -- these are chronic problems that a person tends to have throughout their lives in the way that they behave with other people. So -- so a thought disorder basically refers to a problem with mental functioning whereas, a personality disorder is a way of classifying problems with behavior that a person might be having.

Q. Okay. Is it possible for someone to have a -- a

1 personality disorder and not have a mental disorder

2 A. Yes, it is.

3 Q. Okay. Is it -- is it common?

4 A. It's not very common. Personality disorders result
5 in -- in a lot of maladaptive behavior during a person's life.
6 In other words, they have a lot of problems with their lives.
7 They don't really form strong positive relationships with
8 people, as well. They don't really get along as well in the
9 world. They don't really -- they aren't able to work as well
10 and -- and functioning well and -- and stay married and -- and
11 have healthy personal relationships. And so -- so there's a
12 lot of what's called comorbidity, as -- as was referred to
13 yesterday where -- whereas mental disorders coexist with
14 personality disorders. And, again, as is -- as is the case
15 with other types of conditions, these disorders sort of
16 perpetuate each other.

17 For example, depression can cause somebody to be
18 more isolated and more reclusive and not develop personal
19 relationships, that might cause that person to meet criteria
20 for a personality disorder, whereas a personality disorder,
21 because a person has difficulty in their relationships, can
22 make depression worse, so people start to have these
23 combinations of different conditions throughout their lives
24 that kind of make each other worse and coexist and -- and end
25 up causing the person a greater amount of dysfunction as they

30

1 develop.

2 Q. Doctor, I want to back up just a second because I
3 want to make sure a couple of things are clear here. We are
4 not -- you are -- you are not here to tell this jury that Gary
5 Green is what we would -- in the legal definition of mentally
6 retarded; is that correct?

7 A. He is not mentally retarded.

8 Q. Okay. And we -- we were not -- you were not asked
9 and no one has ever claimed that the Defendant is insane. You
10 were not asked to conduct anything in regards to a sanity
11 issue; is that correct?

12 A. That's a legal term, and I was not asked to do
13 anything with that.

14 Q. I mean, when you say a legal term, you're talking
15 about legal in the realm of what we call -- what we consider
16 forensic psychology?

17 A. That is correct.

18 Q. Are you -- are you a forensic psychologist?

19 A. No, I'm not.

20 Q. You're -- you're a clinical psychologist that
21 diagnoses mental illness, correct?

22 A. That is correct.

23 Q. Okay. Can you tell the jury -- when you conducted
24 your examination of Gary Green, could you tell them the results
25 that you reached in regards to whether or not he had any actual

1 mental illness

2 A. Yes, I did. In reviewing Mr. Green's history and my
3 test results and my clinical observation, I determined that Mr.
4 Green has suffered from severe chronic problems with mood that
5 include both depression and episodes of agitation and
6 irritability and elevated mood which are associated with manic
7 episodes or bipolarity. And I also concluded that he has
8 difficulty with thought. He has a lifelong history of
9 suspiciousness and paranoid thinking and paranoid behavior
10 where he -- he believes that other people are trying to -- to
11 hurt him or do him wrong. And -- and he mistrusts other
12 people, and he's hypervigilant and suspicious.

13 When you have those two main categories of
14 problems together, they -- that meets diagnostic criteria for
15 schizoaffective disorder of the bipolar type. It's a little
16 bit different from bipolar disorder whereas bipolar disorders
17 primarily involves rapid and extreme fluctuations in mood. And
18 it's different from schizophrenia where a person may or may not
19 necessarily have problems with mood at the time that they're
20 having their thought disorder. So with schizoaffective
21 disorder, the person is having problems with mood, and then
22 they have problems with thought. And the problems with thought
23 happen during the problems with mood, but they also happen at
24 other times when the person is not having problems with mood.

25 Q. And, Doctor, can you tell the jury some -- what are

32

1 the common features of an individual or how would the -- how
2 would a person suffering from a schizoaffective disorder
3 bipolar type, how that might affect that person's day-to-day
4 abilities to function?

5 A. Well, they're going to have episodes of severe
6 depression where they become really withdrawn and they don't --
7 they don't do very much. They have episodes of sadness.
8 They'll have what's called affective instability, which means
9 that they'll be depressed on some days, severely depressed, and
10 then other days they can be very anxious and agitated and --
11 and they can have an elevated mood. And so -- so when they're
12 anxious and agitated, they're not going to really be able to
13 function well on those days. And then -- and then they also
14 will have a disturbance in thought where they can have paranoid
15 delusions.

16 So in other words, during those times that
17 they're having those episodes of paranoid delusions, they're
18 going to -- they're going to believe things that are not true.
19 They're going to think that something is happening that is not
20 really actually happening, that people are trying to hurt them
21 or people are conspiring against them or -- or that people are
22 evil or people are trying to do something bad to them. It
23 can -- it can even rise to the level where the delusions are a
24 severe break from reality to where a person believes that
25 there's -- you know, a plot for aliens to take over the world,

1 for example, or something like that, that causes them to -- to
2 become extremely reclusive or something like that. So it can
3 affect a person in a lot of different ways because of their
4 problems with mood and their problems with thought.
5 Q. Okay. And, Doctor, is schizoaffective that you have
6 diagnosed the Defendant, you said that you also went back and
7 -- and the information that you had from his hospitalization
8 about a month before, you -- you had the opportunity to look
9 and review and -- let me just ask you outright. Your -- your
10 actual clinical diagnosis is somewhat different than what he
11 was diagnosed with at Timberlawn; is that correct?

12 A. Yes.

13 Q. Can you tell the jury how it differs and -- and if
14 you can -- and we'll talk about it -- how afterwards.

15 A. Yes. In my review of the records from Timberlawn,
16 it appears that he was diagnosed with a major depressive
17 disorder with psychotic features, which basically means that
18 the person is believed to become psychotic only when they are
19 severely profoundly depressed. In other words, these are
20 people who get so depressed, that -- that they lose touch with
21 reality and they become psychotic because of their depression
22 primarily.

23 And then he was also -- there was also a --
24 what's called a rule out of bipolar disorder which basically
25 means that they felt that there was some indication that the

1 person suffered from bipolar disorder, but they didn't have
2 enough evidence and -- and they felt that clinicians maybe
3 should get more -- usually when people put a rule out is -- is
4 an indicator that there needs to be more evidence in order to
5 formally make that diagnosis.

6 Q. And did the records that you reviewed from
7 Timberlawn Hospital reflect that he was at Timberlawn for a
8 period of about five days?

9 A. I believe so, yes.

10 Q. And he was seen there by a couple of different
11 psychiatrists; is that right?

12 A. That's correct.

13 MR. JOHNSON: May I approach, Your Honor?

14 THE COURT: You may.

15 Q. (BY MR. JOHNSON) Doctor, I want to go through some
16 of these Timberlawn records with you, sir.

17 A. Okay.

18 Q. They've been admitted into evidence. I want to have
19 you look at my copy because I made some notes. You also have a
20 copy of these, also; is that correct?

21 A. Correct.

22 MR. JOHNSON: Andy, do you remember the exhibit
23 number on these Timberlawns?

24 MR. BEACH: In the 140s maybe.

25 (Discussion off the record.)

1 Q. (BY MR. JOHNSON) So what I'm going to ask you to
2 look at is -- is included within -- what's been offered and
3 admitted into evidence as State's Exhibit Number 145. I want
4 to go through a couple of the particulars here and talk to you
5 about the commonality between what he had described back at the
6 initial hospitalization and how that affects your
7 interpretation and diagnosis. Could you -- let's talk about
8 this. Can you tell the jury what it was -- that when he was in
9 Timberlawn Hospital, what it was that he was reporting as
10 the -- why he was there?

11 A. Yes, he -- he was reported to be suffering from
12 depression, increased isolation, decreased energy, increased
13 hopelessness. The clinician described him as being passive.
14 In quotes, he stated just go to sleep and not wake up. He
15 denies suicidal ideation, but said I just want to escape the
16 pain. The note indicates that there were no prior suicide
17 attempts. He also denied homicidal ideation. And -- and
18 denied -- as well as tendency to harm himself and others at
19 that time. He -- he had racing thoughts saying I can't shut
20 off my thoughts.

21 Q. Okay. Let me stop you right there. I want to talk
22 about a couple of these things and talk about how they are
23 clinically important in the diagnosis that you made. These are
24 the -- this is the initial assessment that was done at
25 Timberlawn Hospital; is that correct?

1 A. I believe so, yes.

2 Q. And he's talking about -- he's talking about high
3 levels of depression, correct?

4 A. Correct.

5 Q. High levels of isolation?

6 A. Correct.

7 Q. Very low energy?

8 A. Correct.

9 Q. High levels of hopelessness?

10 A. Correct.

11 Q. And racing thoughts, that he can't shut off his
12 thoughts?

13 A. Correct.

14 Q. Okay. And -- and these -- these are questions --
15 and these are put down here by -- by the individuals that
16 are -- and -- and this isn't just tell me how you feel. He
17 starts saying, well, I have high energy, low energy, high
18 depression -- I mean, these are in response to a clinical
19 evaluation that was done like you've described; is that
20 correct?

21 A. Yes, this appears to be an intake assessment to
22 where -- where they -- he was evaluated.

23 Q. Okay. And in that regard, the -- they would have
24 been doing the type of evaluation and talking to him about the
25 things that were going on in his life and in his mind that they

1 could -- that they could use to try to form the initial
 2 assessment, correct?
 3 A. I believe so, yes.
 4 Q. The fact that he reports high levels of depression,
 5 obviously, since you said that their initial assessment of him
 6 was that he suffered from major depressive disorder; is that
 7 correct?
 8 A. Yes.
 9 Q. And then they said later that to rule out bipolar
 10 disorder -- now, I want take back up on that just a moment.
 11 When -- when you see rule out something in a clinical diagnoses
 12 of an individual --
 13 A. Yes.
 14 Q. -- does that mean that they're saying that they
 15 ruled out that that disorder is there, or what does that --
 16 what is that telling you?
 17 A. No, typically clinicians use the term "rule out"
 18 to -- to describe a -- a situation where they are suspecting
 19 that the person has these types of symptoms, but they need more
 20 information in order to fully provide that diagnosis. So in
 21 other words, they think that this person might have this
 22 problem, but they need to know more in order to fully diagnosis
 23 it.
 24 Q. Okay. And when you have an individual that's
 25 talking about racing thoughts --

38

1 A. Yes.
 2 Q. -- okay, does that seem to show you a -- a
 3 distinction as -- as someone would normally think of as a -- as
 4 a major depressive state?
 5 A. No. Most of the time when people have severe
 6 depression, they don't have racing thoughts. In fact, their
 7 thinking slows down a lot, and they get into a state where they
 8 have what's called psychomotor retardation which is their
 9 thinking slows down to the point where they're very, very slow.
 10 Racing thoughts is more consistent with a manic episode where a
 11 person is not able to control their thinking, and their
 12 thinking is happening -- happening very rapidly. And -- and so
 13 racing thoughts is not consistent with a major depressive
 14 episode.
 15 Q. And when you have -- and when you used the term
 16 awhile ago of "bipolar," bipolarity refers to someone who
 17 suffers from periods of intense lows, as well as periods of
 18 intense highs; is that right?
 19 A. Correct.
 20 Q. And so when you hear people talking about that,
 21 that's what you're looking for is -- is the presence of
 22 depression, as well as the -- the existence of psychotic
 23 episodes for that individual also, correct?
 24 A. A lot of times the -- the manic episodes or the
 25 depressive --

1 Q. I'm sorry, manic instead of psychotic.
 2 A. Yes. Could get so severe that it can lead to
 3 psychosis.
 4 Q. Okay. Going on further in this evaluation, they
 5 talk there's high levels of anxiety?
 6 A. Yes.
 7 Q. High levels of irritability?
 8 A. Yes.
 9 Q. And mood swings?
 10 A. Correct.
 11 Q. And mood swings. What is that telling you as a
 12 clinical diagnostician?
 13 A. Well, it's telling me that -- that there's periods
 14 of elevated mood and periods of depressed mood that is more
 15 consistent with bipolarity.
 16 Q. Okay. There's also -- he was also diagnosed and
 17 questioned in regards to paranoia; is that correct?
 18 A. Correct.
 19 Q. And it -- and it specifically states the presence of
 20 paranoia, and probably one of the classic lines about
 21 paranoia -- could you -- could you tell the jury what the
 22 Defendant reported in regards to the fact that he thought
 23 people were out to get him?
 24 A. Yes. At first he said, people are plotting against
 25 me, they're talking about me, and then he stated, I'm not

40

1 paranoid, I know this is happening.
 2 Q. And that's -- that's kind of the old joke, isn't it,
 3 it's not paranoia if they're really out to get you?
 4 A. Sure.
 5 Q. Okay. And so these -- these are the responses that
 6 are being put down by the -- by the admitting individuals or
 7 people. And -- and finally in regards to this initial
 8 diagnosis, talks about he can't sleep; is that right?
 9 A. Correct.
 10 Q. One of the questions here -- and one of the -- on
 11 this form talks about the precipitating event -- why this
 12 person came -- came to the hospital. Can you tell the jury
 13 what -- what is indicated in response to that?
 14 A. Yes. Mr. Green said, I want to know the truth.
 15 Q. He wants to know the truth about what's causing --
 16 appears to be in response to what's causing all of these
 17 conditions and these things that he's going through. Does
 18 that -- does that appear to be accurate?
 19 A. I -- I would assume that. I'm not sure what he was
 20 referring to when he said, I want to know the truth.
 21 Q. We'll just take it at -- in fact, when it says there
 22 that I want to know -- when it talks about the precipitating
 23 event, it's in quotation marks, I want to know the truth?
 24 A. Yes, that's what he said.
 25 Q. Okay. Can you tell the jury when Mr. Green was put

1 in Timberlawn Hospital, could you tell the jury what
2 medications he was prescribed to -- to have an effect upon the
3 conditions that he was reporting and the major depressive
4 disorder that he was being diagnosed with?

5 A. Yes. I -- I can tell you the names of medications.
6 I'm not a psychiatrist, so a lot of detailed questions about
7 medications will be outside of my area of expertise. But it
8 appears that he was taking Risperdal and Remeron.

9 Q. And is Risperdal typically used to treat evidence
10 and symptoms of schizophrenia?

11 A. Yes. It's a medication that's commonly used for
12 thought disorders.

13 Q. Okay. And the Remeron, that's something you
14 typically see for depression and --

15 A. Correct.

16 Q. Okay. I want to ask you now to look at the
17 diagnosis here that's -- that's contained within these records
18 by Dr. John Pascoe. The -- and this appears to be the final
19 diagnosis before Gary Green was discharged. I want to talk
20 about it again. He's found major depressive disorder,
21 recurrent with psychotic features. What is -- what is that
22 term -- what's psychotic features? What does that indicate to
23 you?

24 A. That indicates that -- that the psychiatrist felt
25 that his depression was severe and that it was -- it was severe

1 enough to be promoting psychosis and that he saw psychosis at
2 the time of the assessment.

3 Q. Okay. I want to look at the consultation notes made
4 by that doctor -- by that psychiatrist, also. It said that
5 after being in the hospital for a day or two -- let's see, he
6 was admitted -- on the 22nd, the psychiatrist made a note that
7 the Defendant felt that he was even more depressed being in the
8 hospital and was eager to be discharged. I want to ask you
9 something about that. Is there anything about that that would
10 surprise you?

11 A. No, I -- I work in a -- on a locked unit in San
12 Antonio at the Nix Hospital System, and it's not uncommon for
13 the patients to themselves feel like they are more depressed
14 after being in the hospital. Being in the hospital is not
15 pleasant. There's other people around that have mental or
16 emotional problems. And you're away from your everyday routine
17 and your home and your environment and your family, and so --
18 so it's not uncommon for people to -- to feel more depressed or
19 -- or believe that they're more depressed when they're in the
20 hospital.

21 Q. Okay. And I want to ask you also, in regards to
22 the -- the diagnosis that was made by a couple of the different
23 psychiatrists there in regards to the major depressive
24 disorder. When we're talking about major depressive order, are
25 we talking about a severe mental illness?

1 A. Yes.

2 Q. And when I talk -- when I use the word "severe," I
3 mean, mental illness can -- doesn't have to always be severe,
4 does it?

5 A. No, it does not.

6 Q. But when you're talking about the type of diagnosis
7 that was made by these doctors, major depressive disorder,
8 recurrent with psychotic features, as well as your diagnosis of
9 schizoaffective -- and they're really not -- and there's not
10 really -- these are not mutually exclusive diagnoses at all,
11 are they?

12 A. No, they're not. They actually share a lot of the
13 same common symptoms. It's just a matter of when the symptoms
14 are occurring in time and whether they occurred together or
15 not.

16 Q. Okay.

17 A. Uh-huh.

18 Q. And the -- your diagnosis of schizoaffective of
19 bipolar type, is that a severe mental illness?

20 A. Yes, it is.

21 Q. And are you going to fully expect that a person
22 suffering from that mental illness to -- to behave differently
23 than obviously someone that doesn't have a mental illness?

24 A. Yes.

25 Q. And can you tell the jury how a schizo disorder of

1 the type that you diagnosed, how might that affect a person in
2 society?

3 A. Well, as I mentioned earlier, the person is going to
4 have episodes where they're going to be severely depressed and
5 withdrawn. They're going to be unmotivated. They're going to
6 have difficulty sleeping. They're going to have problems with
7 their appetite. They're going to have episodes of intense
8 sadness. It could affect their judgment and their thinking.
9 And -- and then they might have episodes -- in schizoaffective
10 disorder where they have agitation or irritability or an
11 elevated mood. And off and on during that time other people
12 are going to see them as being suspicious. They're going to be
13 complaining of suspicious or paranoid thinking. These people
14 are going to be -- individuals with this diagnosis are going to
15 believe that people are trying to harm them or hurt them in
16 some way or that people are trying to do something bad to them.
17 They're going to be paranoid or delusional, or they're going to
18 have some sort of delusion where they believe something is
19 happening that is not really happening.

20 Q. Doctor, I want to go forward some in these records
21 here, and basically I just want to point out some of the things
22 that were being reported and being diagnosed. I want to ask
23 you to look at this page, and these are not actually numbered.
24 I don't believe State's 145 are either. But included in these
25 records are indications, and during another psychiatric

1 evaluation, the Defendant had reported his history of
 2 depression; is that correct?
 3 A. Yes.
 4 Q. Could you tell the jury what he -- how he reported
 5 that to that psychiatrist at that time?
 6 A. Yes. It states there that he said, I've had
 7 depression basically all my life.
 8 Q. Okay. Does he go on to state that he's been -- he's
 9 misunderstood?
 10 A. Yes. He says, I'm misunderstood.
 11 Q. People think that he's F'ing crazy?
 12 A. Yes.
 13 Q. That's what they're really thinking about him?
 14 A. Correct.
 15 Q. And that he can't interact with anyone?
 16 A. Correct.
 17 Q. And what does he -- how does he -- what does he
 18 finally say in regards to those -- I think people have ulterior
 19 motives?
 20 A. I think people have ulterior motives is what he
 21 seems to say there, yes.
 22 Q. Next page, dealing with that same psychiatric
 23 evaluation, he talks about passive suicidal ideation, does he
 24 not?
 25 A. Yes.

1 Q. And what does he report?
 2 A. He says that people are against him, but that he
 3 doesn't have a suicidal plan.
 4 Q. Okay. And then he does not want to -- he does not
 5 ever want to wake up?
 6 A. Yes, I'm sorry, I didn't see that. He does not want
 7 to wake up.
 8 Q. It also talks in the -- in the initial plan of care
 9 that was for this individual, talks about the fact that they --
 10 that they are aware of there that there is a -- a possible
 11 family history of bipolar disorder; is that correct?
 12 A. Correct.
 13 Q. Were you aware that after -- well, let me stop --
 14 let me come back to that. I want you to look at this note
 15 that -- one of the group notes that was made in regards -- in
 16 response to his treatment there at Timberlawn. And we spoke
 17 about it a moment ago that the Defendant -- how did the
 18 Defendant report that he was doing based upon his
 19 hospitalization there?
 20 A. On a note dated 8-22-09, it says: Patient states he
 21 feels more depressed being here.
 22 Q. Okay. And let me stop you right there. He's
 23 reporting that his symptoms are actually getting worse; is that
 24 correct?
 25 A. It appears to be so, yes.

1 Q. Okay. And, again, going back to what he said
 2 earlier, being in a -- being in a, quote, unquote, mental
 3 hospital, it's not a fun place to be, is it?
 4 A. No, it is not.
 5 Q. And -- I mean, the reporting and the psychiatric
 6 notes and evaluations are clearly indicative of someone
 7 suffering from severe mental illness. In fact, he was
 8 diagnosed with severe mental illness?
 9 A. Correct.
 10 Q. And by his own report, his depression is getting
 11 worse due to the fact that he's being hospitalized and in that
 12 environment.
 13 A. That's what he is reporting, yes.
 14 Q. Okay. And finally, Doctor, I just want to ask you,
 15 in regards to his -- is there a description in there about his
 16 being withdrawn and isolated?
 17 A. Yes, on a note dated 8-21-09, by nursing, it
 18 describes him as being withdrawn, blunted affect, and depressed
 19 mood. Patient isolating in his room most of the shift.
 20 Q. Okay. In another group note -- and, again, these
 21 are -- these are notes that are taken over the course of time
 22 that he's there and these -- and these different psychiatric
 23 evaluations and these different group meetings when people are
 24 meeting with him; is that correct?
 25 A. Correct.

1 Q. Can you tell how he's reporting on this particular
 2 occasion?
 3 A. Yes. It says: Patient reported worthlessness, no
 4 place here in this world at all. I know life after death is
 5 for me.
 6 Q. Okay. And I mean, do these -- do these phrases --
 7 and obviously, whoever is doing these evaluations, they're
 8 including these -- these notes and these quotations in their
 9 evaluation. What is the significance of these type of things
 10 when -- when -- for you when someone is reporting these things
 11 to you?
 12 A. This is a very negative ideation, and it's
 13 consistent with what we typically see in people that are
 14 severely depressed, in other words, people who are so depressed
 15 that they really, really think negatively about their
 16 circumstances or their situation. There's a lot of
 17 hopelessness and helplessness in there.
 18 Q. You see the part in here where he's talking about
 19 that he's really in this mental hospital just so he can --
 20 because he's there for a good time so he can get him a
 21 government check. Do you see any part in the notes about that?
 22 A. I did not see anything to that effect, no.
 23 Q. Group -- group notes from later in the week, talking
 24 about the Defendant, just sits quietly, doesn't participate.
 25 Could you talk to us about that? What does -- what does that

1 indicate to you or what might that indicate to you?

2 A. That indicates to me that he's very withdrawn --
3 socially withdrawn, that he's in an emotional state where it's
4 probably very difficult for him to have enough initiation to
5 socialize with other people. And -- and basically a person
6 who's -- who's mentally and emotionally isolated and withdrawn
7 themselves.

8 Q. And finally, Doctor, on this last note that I want
9 you to review, could you talk and explain what the attending
10 psychiatrist put down in regards to his feelings?

11 A. Yes. Reported feelings of paranoia, and then in
12 parenthesis, everyone has hidden agendas, people exploit you.
13 Increased anxiety, increased depression, increased isolating
14 behaviors.

15 Q. I want to stop you there.

16 A. Yes.

17 Q. This is -- this is a psychiatric note that the
18 person has -- has -- that his levels of anxiety are increasing,
19 his levels of depression are increasing, his level of isolated
20 behaviors are increasing?

21 A. Correct.

22 Q. Okay. It doesn't sound like whatever they're doing
23 in there is actually -- is actually doing much to combat the --
24 the reported symptoms that he's been experiencing; is that
25 right?

50

1 A. Well, it appears like he's still suffering from
2 severe symptomatology and -- and according to these notes, some
3 of it may be increasing.

4 Q. There's a quotation -- in the next line, there's a
5 quotation coming from the Defendant. Can you tell -- can you
6 tell them how he reported to the psychiatrist?

7 A. Yes. Well, the psychiatrist reports positive
8 suicidal ideation, passive. And then in quotes it says: I'd
9 be happy once I die.

10 Q. And how did he report feeling?

11 A. Patient identifies hopeless feelings, stating, I'm
12 worse than when I got here.

13 Q. Okay. And as we've talked about, also, Doctor, I
14 mean, not -- I mean, that's not the result that you're looking
15 for when you have a person that's hospitalized, is it?

16 A. No, of course not.

17 Q. Okay. And you are aware that he was subsequently
18 discharged with the diagnosis and a referral for a follow-up
19 at -- I'm not -- you're not familiar with the North Star
20 program or the Metrocare Clinic here in Dallas, are you?

21 A. I'm not familiar with those programs.

22 Q. Are you familiar with the Timberlawn Hospital here
23 in Dallas?

24 A. No, I'm not familiar with that hospital, either.

25 Q. And you were also asked to review --

1 MR. JOHNSON: Judge, if I could ask the

2 reporter --

3 What notes were the Metrocare notes?

4 COURT REPORTER: 146.

5 Q. (BY MR. JOHNSON) I want to ask you to look at my
6 copy of what's been offered and admitted into evidence as
7 State's Exhibit Number 146. And I want to ask you if after
8 Gary Green was discharged from Timberlawn Hospital -- and let
9 me ask you this. The notes reflect that Gary -- Gary Green was
10 discharged from Timberlawn because he requested to be
11 discharged; is that correct?

12 A. I believe I recall reading that somewhere.

13 Q. Okay. And there is an actual way that you can
14 forcibly detain or hold someone in a mental hospital, correct?

15 A. Correct.

16 Q. And that's -- and what's the actual terminology for
17 that?

18 A. Commitment.

19 Q. Okay. And in order to get a commitment, what's the
20 standard that has to be met?

21 A. The person has to be determined to be an impending
22 danger to himself or others at that time.

23 Q. Okay. And stating that you think he'll be better
24 off when he's dead, I just want to -- I just don't ever want to
25 wake up again, things are -- those descriptions, they don't

52

1 meet the level of being able to actually get someone -- force
2 someone to stay, do they?

3 A. It appears that the clinician did not feel that they
4 needed a commitment at that time.

5 Q. Well, he's not actively saying, I'm going to kill
6 myself today, I'm going to kill myself tomorrow, or I'm cause
7 anybody else that kind of harm. There's no impending actual
8 threat at that time?

9 A. It appears to be so, yes.

10 Q. Okay. It appears that once he left Timberlawn
11 Hospital, they had given him instructions to follow this --
12 follow this up. And when he left the hospital, he was -- he
13 left the hospital on those medications that he had been given
14 for his depression and for his -- the treatment of the
15 schizophrenic type symptomatology; is that correct?

16 A. Correct.

17 Q. And he was referred over to North Star, and, in
18 fact, he did follow up over there a few days later; is that
19 correct?

20 A. It appears that there's a clinical note dated
21 8-27-09.

22 Q. Okay. And so he did go back there at that time and
23 he was -- and he went in, they did the same type of evaluations
24 with him at that time speaking about the symptoms that he was
25 experiencing and the -- reporting basically the same

1 symptomatologies; is that correct?

2 A. Correct.

3 Q. Okay. Now, Doctor, as far -- Doctor, the -- the

4 mental diagnosis that we have been talking about here -- and,

5 again, I just want to stress, when you talk about a

6 schizoaffective disorder bipolar type, we're talking about a

7 severe mental illness?

8 A. Correct.

9 Q. Is that -- is that consistent with the things that

10 he had been reporting not only when he was in the Timberlawn

11 Hospital, but also when he went to the North Star?

12 A. Yes.

13 Q. And is that consistent with the information and the

14 diagnosis that you formulated for this particular Defendant

15 yourself?

16 A. Yes, it is.

17 Q. Okay. And that is the mental diagnosis or the

18 thought mood disorder that you described earlier; is that

19 correct?

20 A. That is correct.

21 Q. Okay.

22 MR. JOHNSON: Judge, can we approach real quick?

23 THE COURT: You may.

24 (Sidebar conference.)

25 Q. (BY MR. JOHNSON) Doctor, you had said earlier that

54

1 the -- other than the -- what we classified in regards to the

2 mental illness aspect of the diagnosis, there is also a --

3 behavioral disorders. You talked -- you talked about those

4 being what is referred to as Axis II diagnoses; is that

5 correct?

6 A. That is correct.

7 Q. Could you -- without getting too technical, could

8 you tell -- tell the jury what's the distinction really between

9 an Axis I and Axis II diagnosis?

10 A. Yes. An Axis I diagnosis refers -- is where we code

11 mental disorders like depression, schizophrenia. These are

12 serious problems that imply problems with brain function and

13 problems with mood and thinking, whereas Axis II is a place

14 where we code personality and behavioral problems. These are

15 considered -- they can be serious, as well, but they're

16 considered to be -- to involve more how a person relates to

17 others around him or how a person behaves or -- or acts in the

18 world.

19 Q. Okay. Now, Doctor, in regards to the -- Gary Green,

20 were you able to also diagnose him with personality disorder?

21 A. Yes. I wasn't able to diagnoses him with a specific

22 personality disorder, and I didn't do a thorough enough

23 assessment to do that, but I was able to diagnose him with

24 features of different personality disorders.

25 Q. Okay. And can you tell the jury what personality

1 disorders or what your actual Axis II diagnosis was?

2 A. Yes. In -- in my report with the information that I

3 had at that time, I felt that he had features of paranoid

4 personality disorder. And this is very common in people with

5 schizoaffective disorder where their paranoid thinking is sort

6 of part of their personality. These are people who -- people

7 who have this condition often believe that everybody is out to

8 get them, that people are trying to hurt them, they're very

9 mistrustful of others, they're very mistrustful of everybody

10 else's intentions. And this is something that is occurring

11 every day in their lives, and it's affecting the way that they

12 interact with other people. It can make them avoidant or make

13 them not have relationships with other people or make them be

14 more suspicious or hostile to other people because they feel

15 that other people are -- are doing something bad to them.

16 I also felt he had features of what's called

17 borderline personality disorder, which -- which includes a lot

18 of -- what's called behavioral decompensation. People with

19 borderline personality disorder, whenever they feel threatened

20 or they feel that something bad is going to happen to them or

21 they feel abandoned, they -- they can go into a rage, they

22 become irritable, they lose control of their behavior, they --

23 they also have a lot of what's called suicidal gesturing, which

24 means that they tell people over and over again that they'd

25 rather die or that they want to kill themselves or things like

56

1 that. So he had some features of that personality disorder.

2 He also had features of what's called avoidant

3 personality disorder. People with this type of disorder,

4 they -- they tried to -- they tend to stay to themselves. They

5 don't like to socialize. They don't enjoy socializing. They

6 would rather be in their room watching television than talking

7 with people. They would rather be on their own. And, in fact,

8 they get very nervous or anxious around other people. And --

9 and they have difficulty relating to other people.

10 And then -- and then I also think that in

11 addition to his -- his depression, he also sort of has a

12 depressive personality. In other words, he's the type of

13 person who's always thinking negatively about things. You

14 know, people with depressive personalities, they don't always

15 have to be severely depressed, but just most of the time in

16 their lives, they're -- they -- they're -- they think

17 negatively about themselves. They feel kind of hopeless and

18 helpless and they think that bad things are happening to them

19 all the time. They sort see the glass as half empty, instead

20 of half full. So at the time I felt that he had these

21 features. I -- I have modified my opinion somewhat after

22 sitting in the courtroom, and I can discuss that if needed, as

23 well.

24 Q. That's what I was going to talk to you about next.

25 A. Yeah.

1 Q. Again, going back to what we spoke about earlier in
2 regards to the referral questions that we asked, we were asking
3 you to perform a -- a mental diagnosis in regards -- well, a
4 complete mental diagnosis, but specifically in regards to
5 really the Axis I, the mental aspect.

6 In regards to the borderline personality or
7 the -- I'm sorry, the personality disorders, several of which
8 you've kind of defined and discussed, there's another
9 personality disorder known as antisocial personality disorder;
10 is that correct?

11 A. That's correct.

12 Q. Okay. And in order to -- and one of the -- probably
13 the most common element or the common feature of the antisocial
14 personality disorder is a complete understanding and a complete
15 history in regards to the person's criminal behavior; is that
16 right?

17 A. That's correct.

18 Q. Okay. And that information in regards to the mental
19 diagnosis, that information was not provided to you, was it?

20 A. That's correct. The referral question was to
21 evaluate his -- his mental functioning, his mental disorder,
22 and at the time that I conducted my assessment and -- and wrote
23 my report, although I knew that the Defendant was charged with
24 capital murder, I did not have information regarding his -- his
25 criminal history.

1 Q. And it was not necessary for what you were asked to
2 do, was it?

3 A. No, it was not.

4 Q. Okay. Now, as -- as you said just a moment ago, as
5 an expert witness in a case, you're allowed to sit in here and
6 actually hear -- hear testimony and you were able to hear the
7 testimony from the Defendant's family members, as well as Dr.
8 Gray-Smith; is that correct?

9 A. That's correct.

10 Q. After hearing this information, do you have any
11 opinions as to whether or not the Defendant does, in fact,
12 exhibit characteristics that would be consistent with
13 antisocial personality disorder?

14 A. Yes, I think his -- his criminal history would meet
15 the criteria for -- one of the criteria for antisocial
16 personality features, as well. One of the -- the things about
17 personality disorders is that in order to diagnose somebody
18 with a personality disorder, there has to be some evidence that
19 they don't demonstrate that particular issue as a result of
20 another condition.

21 In other words, if a person avoids other people
22 because they are depressed, then they may not meet the criteria
23 for avoidant personality disorder. They'll only meet the
24 criteria for avoidant personality disorder if they avoid other
25 people when they're not depressed, as well. And so -- so when

1 I'm diagnosing a mental disorder in somebody, I do extensive
2 testing and extensive assessment, but if I want to diagnose a
3 behavioral disorder, I have to be more specific, and I have to
4 be able to rule out that those features of those behavioral
5 disorders were not caused by another condition, such as a manic
6 episode or a depressive episode and so forth.

7 But I'm sorry for the long-winded answer, but to
8 answer your question, yes, I do feel that after what I've
9 learned since I've been here, that Mr. Green will -- will meet
10 DSM-IV diagnostic for antisocial personality features or
11 possibly an antipersonality disorder, as well.

12 Q. Okay. Is there also some things that -- and when we
13 spoke about this -- and -- and talking about it, you said that
14 there are some things about us that certainly need more
15 information in regards to a couple of the particular symptoms
16 that you looked for in your DSM-IV evaluation. What -- what
17 particularly are those?

18 A. Well, we're -- we're looking for -- in order -- in
19 order for a person to meet criteria, they have to -- they have
20 to exhibit certain symptoms and certain features or certain
21 behaviors. And -- and when we're looking at mental disorders
22 -- for example, when we're looking at depression, we look for
23 disturbances in sleep and appetite, mood, sadness, lack of
24 initiation, lack of interest in -- in usual activities and so
25 forth.

1 When we're looking at Axis II diagnoses, we look
2 at what kinds of problems has this person had in their
3 interpersonal behavior that are causing them social and
4 occupational dysfunction in their lives. In other words, what
5 kind of problems are they having that are interfering with
6 their everyday living? And -- and oftentimes individuals
7 have -- and you've heard this term a lot lately -- is
8 comorbidity where they have a lot of different things. And so
9 it's not uncommon for us to find an individual to have multiple
10 features of multiple personality disorders all mixed in
11 together.

12 In Mr. Green's case, I saw features of avoidant
13 personality disorder. I saw features of paranoid personality
14 disorder. I saw features of borderline personality disorder
15 and -- and depressive personality disorder. And -- and the
16 more I learned about him, I also see features of antisocial
17 personality disorder, as well.

18 Q. And the distinction between the actual personality
19 disorder and a mental illness -- a mental illness is -- I mean,
20 the personality disorder is your -- your behavior, your
21 interaction with others. A mental illness, the Axis I
22 diagnosis goes to an actual chemical imbalance, something -- I
23 mean, something in the brain that can't be controlled by the
24 individual; is that right?

25 A. The mental illness is -- is implied that there is --

1 that there is a much greater amount of dysfunction in thought
2 and mood and -- and implied brain functioning, as well. And so
3 -- so as we mentioned before, the -- the personality disorder
4 describes a person's behavior, whereas a mental disorder
5 describes a person's functioning, their -- their mood and their
6 thinking on -- on a different kind of a level. And, yes,
7 people can -- and they often do, will have a mental disorder
8 and a personality disorder.

9 In Mr. Green's case, no matter what personality
10 disorder that he has, it doesn't matter if he has all of them,
11 he still has schizoaffective disorder and it's still severe.
12 He still has episodes of severe depression, mixed in with
13 agitation and mania and racing thoughts, and he still has a
14 lifelong history of paranoid and delusional ideation that
15 happens with the mood problems and without the mood problems.
16 So either way, regardless of how many personality disorders he
17 has, he's still going to meet diagnostic criteria for
18 schizoaffective disorder.

19 Q. Schizoaffective disorder is an actual treatable
20 medical -- medical, slash, mental condition, is it not?

21 A. It's treatable, yes. I mean, there's medications
22 that are given to treat it. It's a chronic condition, so it's
23 something that -- that happens throughout a person's life and
24 it will recur. Just like all other mental disorders, it'll get
25 exacerbated in times of stress. In other words, when people

62
1 get more stressed or more dysfunctional, the disorder will get
2 worse. When people have good stability in their lives and good
3 support and good treatment, the condition will get better. So
4 it's just like any other mental disorder where there are
5 treatment options, but there's a lot of different factors that
6 come into play as to whether a person does well or not.

7 Q. But the drugs that we talked about earlier that the
8 Defendant was placed on and put on, those are drugs that are --
9 that are specifically designed -- are designed and used to
10 treat the symptomatology of both schizoaffective and
11 depression; is that correct?

12 A. Correct.

13 Q. Doctor, I want to ask you something -- briefly about
14 the comorbidity of drug usage in regards to behavioral
15 disorder -- or mental illness. Do you often find that
16 individuals suffering from mental illnesses will self medicate?

17 A. There is a -- there's a very high comorbidity
18 between mental disorders and substance abuse. In other words,
19 those two things exist hand-in-hand in a large number of
20 people. And -- and, yes, in -- in certain people, people with
21 untreated depression and anxiety or people who don't -- who
22 have all different types of mental disorders, schizophrenia or
23 whatever it may be, there is a much higher incidence of them
24 over using illicit drugs and alcohol. And -- and, yes, the --
25 the -- it's commonly felt that they -- that they, quote,

63
1 unquote, self medicate. In other words, they -- they're trying
2 to sort of get some relief from the -- the tension and pain and
3 emotional turmoil that they're experiencing as a result of
4 their mental disorder so they have a much higher tendency to
5 abuse legal drugs and illegal drugs.

6 And then with comorbidity, what ends up
7 happening is that the drugs can make the condition worse. In
8 other words, it's not an effective treatment because it causes
9 the problems -- the person more problems in their life. So as
10 they use drugs as an ineffective way of treating their mental
11 disorder, they get worse over time. And so those two things
12 exist together in a large number of people that are
13 dysfunctional.

14 Q. Okay. Doctor, the last area I want to talk to you
15 about is an area -- I guess you're going to tell us. Do you
16 have any expertise in the area of psychopathy?

17 A. No, I do not.

18 Q. And can you tell the jury what psychopathy is?

19 A. Well, psychopathy is a term that is sometimes
20 mistakenly used as a synonym -- thought to be similar to
21 antisocial personality disorder or sociopathy, but it's a --
22 it's a specific term that's used clinically -- that people use
23 who do a lot of research in the area and -- and work in the
24 area of forensic psychology. As clinicians, I don't have
25 specific training and experience in evaluating and treating

64
1 antisocial personality disorder. For example, I can diagnose
2 it in a person who -- who comes into my office if -- if they
3 meet the diagnostic criteria, but psychopathy is a different --
4 is a term that refers to something related, but it does have
5 different meaning than antisocial.

6 Q. And you are not -- again, you're not -- you're not a
7 forensic psychologist?

8 A. Correct.

9 Q. You weren't asked to perform a forensic evaluation
10 of the Defendant?

11 A. Correct.

12 Q. And you have no expertise in the area of psychopathy
13 or what's -- You're familiar with what's known -- or you're
14 familiar with the terminology of the HARE, PCL-R; is that
15 correct?

16 COURT REPORTER: The what --

17 Q. (BY MR. JOHNSON) The h-a-r-e, hare, PCL-R -- PCL,
18 dash R -- Psychopathy Checklist Revised; is that correct?

19 A. I'm -- I'm familiar with the terminology, but I've
20 never used or administered that test.

21 Q. Doctor, I believe that's all the questions I have
22 for you now, sir, thanks.

23 THE COURT: Ladies and gentlemen, we're going to
24 take our morning break.

25 THE BAILIFF: All rise.

1 (Jury excused from courtroom.)
2 THE COURT: On the record. On the record.
3 MR. JOHNSON: Judge, at this time the -- comes
4 now the Defendant, we're going to move for a motion and ask the
5 Court to grant a Motion in Limine with regards to attempting to
6 question or trying -- or questioning this witness outside of
7 any of the areas that he's qualified to testify. He's already
8 testified -- he's already testified that he's not capable of
9 testifying in matters -- in relation to matters of forensic
10 psychology. And we're going to ask that the State not continue
11 to inquire of him in matters relating to forensic psychology
12 and matters relating to future dangerousness which would be
13 inappropriate and impermissible under the current status of the
14 law.
15 THE COURT: All right.
16 MR. BEACH: I'm not going to ask him his opinion
17 about future dangerousness. That motion is so broad that if
18 I -- if the word "murder" comes out of my mouth, you know, he
19 might object that I'm getting outside his area of expertise, so
20 I'm not going to ask him any kind of ultimate issue opinion
21 about future dangerousness.
22 MR. JOHNSON: Well, also, it goes to the issue
23 in regards to trying to have this witness come in and try to do
24 some type of psychopathy rating.
25 THE COURT: I -- I understand what -- what you

66

1 want. I think that --
2 MR. BEACH: It can be handled by objection,
3 hopefully --
4 THE COURT: I think it can be handled by
5 objection rather than Motion in Limine, so I'm not going to
6 grant a Motion in Limine, but feel free to object and we -- we
7 can talk about it.
8 MR. JOHNSON: Well, okay --
9 THE COURT: I'm just not going to grant a Motion
10 in Limine. I'm not saying that I wouldn't sustain that
11 objection -- that very objection that -- that you're making. I
12 notice that if you ask that in a very direct line which he
13 knows it will get sustained, but as far as --
14 MR. JOHNSON: Well, I can tell you, Judge,
15 there's about three minutes after we begin this examination,
16 that we're going to have to have another hearing because I'm
17 certain --
18 THE COURT: Okay, I disagree.
19 MR. JOHNSON: Okay.
20 THE COURT: I'm not saying that we won't have a
21 hearing. I think he's going to ask it right. So anyway --
22 (Discussion off the record.)
23 MR. BEACH: Judge, do I need to offer that
24 letter now?
25 THE COURT: It's already been admitted for

1 record purposes.
2 MR. BEACH: Oh, for record purposes.
3 THE COURT: All of those have been admitted for
4 record purposes.
5 MR. BEACH: He has no objection to me reading
6 that?
7 MR. JOHNSON: I have no -- what number is it?
8 MR. BEACH: It's 148.
9 MR. JOHNSON: I have no objection to him reading
10 the agreed-upon sentence from State's Exhibit 148 that's been
11 admitted for record purposes.
12 THE BAILIFF: All rise.
13 THE COURT: Okay.
14 (Jury returned to courtroom.)
15 THE COURT: Thank you all. Please be seated.
16 Cross.
17 CROSS-EXAMINATION
18 BY MR. BEACH:
19 Q. State your name for the record again, please.
20 A. My name is Dr. Gilbert Martinez.
21 Q. And you are the same Dr. Gilbert Martinez that
22 testified before the lunch break; is that correct?
23 A. Correct.
24 Q. Doctor, let's just get set in stone what Gary Green
25 is not, okay?

68

1 A. Okay.
2 Q. Based on your training and experience and your --
3 you spent about six, seven hours total with Gary Green in your
4 lifetime; is that correct?
5 A. Correct.
6 Q. Gary Green is not schizophrenic?
7 A. Correct.
8 Q. Gary Green is not bipolar?
9 A. Correct.
10 Q. Gary Green is not mentally retarded?
11 A. Correct.
12 Q. And you did six separate I.Q. testing procedures; is
13 that correct?
14 A. I gave -- I gave one I.Q. test that has 14 subtests.
15 Q. Okay. And it yielded six different types of I.Q.
16 scores; is that correct?
17 A. It yields -- I'm not sure if it's six different
18 types. I think it's five, if I'm not mistaken.
19 Q. That's not a big deal. Five or six?
20 A. It's five.
21 Q. And the values fell between 78 and 84; is that
22 correct?
23 A. That is correct.
24 Q. And four of the five values you testified to fell in
25 the low average range; is that correct?

69

1 A. That is correct.

2 Q. And were you provided Mr. Green's penitentiary

3 records, sir?

4 A. No, I was not.

5 Q. And since you were not provided his penitentiary

6 records, would it surprise you that his screened I.Q. in the

7 prison system was 105?

8 A. Yes, I would be very surprised.

9 MR. BEACH: May I approach, Judge?

10 THE COURT: You may.

11 MR. BEACH: Did you pull them out? Are you

12 tricking me again?

13 Q. (BY MR. BEACH) This is a prison record. I.Q. --

14 what does that say there?

15 A. It says 105.

16 Q. Okay. Here's another prison record. We can look

17 through all of them. The same I.Q. of 105; is that correct?

18 A. Yes. I would be interested to see what test they

19 used.

20 Q. Okay. Do you have any explanation, Doctor, as to

21 why Mr. Green's I.Q. went from 105 down to 78 --

22 A. Yes.

23 Q. -- after he murdered Lovetta Armstead and Jazzmen

24 Montgomery?

25 A. I would be very interested to see what test was used

70

1 because different tests have different reliability and

2 validity. There are some tests that are just screening

3 measures -- in other words, a person can be asked a few

4 questions. There's even tests on the internet that a person

5 can take to give you an I.Q., but it's really not considered

6 acceptable methodology for psychologists and

7 neuropsychologists, so I -- I would like to have more

8 information about that before I can explain a discrepancy.

9 Q. You told us that Mr. Green has cognitive deficits;

10 is that correct?

11 A. That is correct.

12 Q. But, again, whether it's his I.Q. -- and you

13 differentiated I.Q. from cognitive deficits; is that right?

14 A. That is correct.

15 Q. But they're similar; is that correct?

16 A. They have a -- there's a lot of overlap in

17 functioning, yes, correct.

18 Q. You told us that based on his low average I.Q.'s in

19 four to five areas, you would expect that Mr. Green could live

20 independently; is that correct?

21 A. People with I.Q.'s in that area usually are able to

22 live independently; that's correct.

23 Q. And you sat in here yesterday and you heard the

24 education expert; is that correct?

25 A. That is correct.

71

1 Q. That Mr. Green wasn't -- should have been referred,

2 I guess, for some type of special ed evaluation?

3 A. Correct, I did hear that.

4 Q. And you've also -- you read a letter here -- or

5 excerpts from a letter here, Doctor, that Mr. Green wrote to

6 his girlfriend about 20 years ago while in the penitentiary

7 where he said, I'm currently attending college to get my

8 associate's and to hopefully start on my second degree before

9 my time of release is up. Did you read that?

10 A. Yes, I did just read that recently.

11 Q. Now, you also administered cognitive -- ability

12 tests; is that correct?

13 A. That is correct.

14 Q. And you told us that you administered the Trails A

15 and B test; is that right?

16 A. That is correct.

17 Q. And before we get to that, did you also utilize

18 certain psychological techniques to help you in your --

19 developing your opinions?

20 A. Psychological techniques? Do you mean the use of

21 psychological tests?

22 Q. Specifically, did you utilize a draw a person

23 technique?

24 A. Yes, I -- I administered that, but I -- I did not

25 rely heavily on that for my opinion.

72

1 Q. Can you pull that out of your file, your neuropsych

2 testing and --

3 A. Yes.

4 Q. While you're at it, did you have him draw a family

5 technique, as well?

6 A. Yes.

7 Q. Is that the Trail 8 there?

8 A. Yes.

9 Q. Kind of keep that open.

10 A. Uh-huh.

11 Q. And you had Gary Green draw a person; is that

12 correct?

13 A. That is correct.

14 Q. And that was part of your psychological testing?

15 A. Correct.

16 MR. HEALY: Judge, can you dim the lights,

17 please?

18 Q. (BY MR. BEACH) And this is the person that Gary

19 Green drew during your neuropsychological testing of him; is

20 that correct?

21 A. That's correct.

22 Q. You've seen the Timberlawn records; is that -- is

23 that right?

24 A. Yes, I have.

25 Q. And one of the Timberlawn records they have -- they

1 have -- a certain five or six faces from smiling all the way to
 2 frowning about how much pain he's in; is that correct?
 3 A. I believe so, yes.
 4 Q. And at least as of that day, the best of pain was 3
 5 out of 5; is that correct? Can you see that? Can you look,
 6 Doctor, there's a TV screen right there by your right hand --
 7 by your right hand.
 8 A. Okay. By my right hand.
 9 JUROR: No, down.
 10 Q. (BY MR. BEACH) Other right.
 11 JUROR: That's your left hand.
 12 Q. (BY MR. BEACH) There you go.
 13 A. I need testing.
 14 Q. We all do.
 15 3 out of 5; is that correct?
 16 A. Okay. Let's see here. Current pain scale rating.
 17 It does say 3 out of 5 there, yes.
 18 Q. Point to the -- the face which demonstrates the 3
 19 out of 5.
 20 A. Okay. Do I point to it up here?
 21 Q. Right there on the screen, just touch -- just touch
 22 it with your hand or use that pointer there.
 23 A. Oh, this -- this screen here?
 24 Q. Yes.
 25 COURT REPORTER: No, no.

1 Q. (BY MR. BEACH) That screen -- that screen right
 2 there.
 3 MR. JOHNSON: Bottom one.
 4 A. Bottom one, okay. This one right here?
 5 Q. (BY MR. BEACH) There you go. Perfect.
 6 A. Okay.
 7 Q. That's the 3 out of 5?
 8 A. I believe so. That one says 3 severe pain.
 9 Q. Okay. And -- all right. That's good. Then you
 10 also had Mr. Green draw a -- draw a family; is that correct?
 11 A. That is correct.
 12 Q. And this is Mr. Green's effort to do that?
 13 A. Yes.
 14 Q. And although you do not rely on these techniques
 15 heavily, they did factor some -- somewhat into your -- your
 16 opinions?
 17 A. These are referred to as projective tests, and they
 18 do some standardization.
 19 Q. Okay.
 20 A. But I -- I do not use that standardization. What I
 21 mainly use these measures for is just to see -- to get a rough
 22 idea of a person's perceptual ability, how they organize
 23 information and things like that visually. I don't use them in
 24 the traditional sense where I try to read a lot into what
 25 caused them to draw people a certain way or what caused -- you

1 know, other psychologists do in different contexts, but I don't
 2 use them that way.
 3 Q. Now -- I'm sorry --
 4 A. Different tests can be used -- I'm sorry.
 5 Q. I'm sorry.
 6 A. -- different tests can be used in different ways by
 7 psychologists, and I just give these -- they're sort of like
 8 auxiliary measures that I don't rely on very much unless
 9 there's something really unusual about them.
 10 Q. You also administered the Trails A cognitive test;
 11 is that correct?
 12 A. That is correct.
 13 Q. And do you have that with you?
 14 A. Yes, I do.
 15 Q. Can I can get that displayed? You're familiar with
 16 where the TV screen is now?
 17 A. Yes, I think so. I might miss it.
 18 Q. All right. What are you trying to get Mr. Green to
 19 do on this -- on this test?
 20 A. This test is a measure of psychomotor speed and
 21 mental tracking, so basically what the person does is connect
 22 the numbers in order beginning with number 1. And this is the
 23 sample. It's the practice part. And then the following page
 24 has the actual test. And it's a measure of how fast their
 25 psychomotor speed is and how fast their tracking is.

1 Q. And Mr. Green was able to complete that exercise
 2 without any errors; is that correct?
 3 A. That's correct.
 4 Q. And the 34 up there, in the upper right, what does
 5 that signify?
 6 A. That it took him 34 seconds to complete it.
 7 Q. Is that within average range?
 8 A. That's within the average range, yes.
 9 Q. Now, you have the Trails B test, as well.
 10 A. That should be on the --
 11 Q. The other side of that.
 12 A. -- the third page is where that would start, I
 13 think. The -- the second page there is actually going to be
 14 the actual Trails A test.
 15 MR. JOHNSON: Judge, excuse me. I don't believe
 16 these -- I don't have any objection. I don't believe any of
 17 these documents have been offered or admitted. Am I incorrect
 18 on that?
 19 MR. BEACH: No, you're not incorrect.
 20 THE COURT: No, they need to be admitted.
 21 MR. JOHNSON: We need to do something so they --
 22 for the purposes of the record.
 23 THE COURT: Yeah. Go ahead and mark them.
 24 MR. BEACH: He wants his originals back. Does
 25 he need the originals back?

1 A. That's the only copy that I have. That is Trails A,
 2 the actual test.
 3 (Discussion off the record.)
 4 Q. (BY MR. BEACH) That's the actual Trails B.
 5 A. That is Trails B; that's correct.
 6 (Discussion off the record.)
 7 MR. BEACH: At this time, Judge, we would offer
 8 into evidence State's Exhibits 161 through 165, inclusive, and
 9 we would agree to make copies -- substitute the copies for the
 10 record so the Doctor can have his originals back.
 11 (State's Exhibits 161 through 165 offered.)
 12 MR. JOHNSON: We would have no objection.
 13 THE COURT: They are admitted.
 14 (State's Exhibits 161 through 165 admitted.)
 15 Q. (BY MR. BEACH) Going back to State's 164, Doctor,
 16 this is the actual Trails A test; is that correct?
 17 A. That's -- yes, that is correct.
 18 Q. So you start at 1 and go all the way to the end; is
 19 that correct?
 20 A. That is correct.
 21 Q. And State's 165 is the Trails B test?
 22 A. Yes, correct.
 23 Q. And what are you trying to see if Mr. Green can do
 24 on this neuropsych test?
 25 A. This one is actually similar to Trails A in that

1 it -- it tests for psychomotor speed and mental tracking, but
 2 in this one, as you can see, the subject has to alternate
 3 between letters and numbers and so there's a mental shifting
 4 component. In other words, he has to shift his thinking from
 5 numbers to alphabet, and he has to do this as quickly as he
 6 can. So it's measuring his -- the speed of his mental
 7 shifting, as well.
 8 Q. And is the Trails B test thought of as a test for
 9 higher level cognitive ability?
 10 A. Yes, to an extent. It is -- it is thought of as a
 11 test of what's called executive functioning, mental shifting.
 12 It's not -- obviously, not a test of complex thinking or
 13 anything like that. It's more of a mental shifting test.
 14 Q. And was Mr. Green able to complete the Trails B test
 15 without error?
 16 A. Yes, I believe so.
 17 Q. Can you move it down a little bit?
 18 A. Yes, he completed it without errors.
 19 Q. And the time that he completed it in, was that
 20 within the average range?
 21 A. It's within -- yes, it's -- he fell in the 15th to
 22 25th percentile which is -- sort of like the low average to
 23 average range.
 24 Q. All right. Thank you.
 25 A. Yes.

1 Q. And we'll get you your originals back here.
 2 A. Thank you.
 3 Q. Okay. So you were not provided -- strike that.
 4 You testified on direct -- the more information
 5 that you had available to you prior to conducting your
 6 neuropsych test, the better off you were going to be; is that
 7 correct?
 8 A. A neuropsychologist always wants to get as much
 9 information as possible before making a diagnosis, but we are
 10 under some constraints sometimes.
 11 Q. Well, Mr. Green, as you know, spent ten years in the
 12 penitentiary from 1990 to 2000 on an aggravated robbery
 13 offense. You were not provided with his penitentiary records,
 14 whether it was his parole records or medical, psychological
 15 records for that ten-year stay?
 16 A. That is correct.
 17 Q. And would it surprise you that nowhere in Mr.
 18 Green's penitentiary records during that ten-year time frame
 19 was he ever diagnosed with any kind of mental illness?
 20 A. It would -- it would surprise me in a sense, but it
 21 wouldn't be surprise me because it's not uncommon for people in
 22 prisons, is my understanding, to not get care for mental
 23 health. So I guess -- I guess I would be a little bit
 24 surprised, but not too surprised.
 25 Q. I mean, he was -- he was treated for stress

1 management, had some insomnia and anxiety and stress, but never
 2 was diagnosed with any kind of either mental illness -- with
 3 any kind of mental illness; that wouldn't surprise you?
 4 A. It would -- it would be the same answer. I would be
 5 a little surprised, but I wouldn't expect it to be outside of
 6 the realm of possibilities.
 7 Q. Now, you also were provided Mr. Green's Parkland
 8 jail and health records; is that correct?
 9 A. Yes.
 10 Q. Okay. And in those records, we have records going
 11 back to 2006 where Mr. Green was in the Dallas County Jail. Do
 12 you recall that?
 13 A. Yes.
 14 Q. And let's just start with '06 to '08. Did you see
 15 anywhere in there -- in those records where Mr. Green was
 16 diagnosed with schizoaffective or any other kind of mental
 17 illness?
 18 A. I do not recall seeing that.
 19 Q. In the 2008 records, it does state that Mr. Green
 20 used marijuana on a daily basis. Do you recall seeing that?
 21 A. I do recall seeing that, yes.
 22 Q. And an individual that uses marijuana on a daily
 23 basis, combined with morbid obesity, combined with very high
 24 blood pressure, that could lead to depressive looking symptoms,
 25 couldn't it?

1 A. No, not -- not necessarily. I -- I wouldn't be able
 2 to answer yes to that question.
 3 Q. I'm not asking -- it can, though?
 4 A. I -- I don't really know how to answer that
 5 question. Obesity can be linked to depression. Hypertension
 6 in itself is not directly associated with depression that I
 7 know of. And -- and chronic marijuana use can contribute to
 8 depressed affect in some people or it can contribute to the
 9 opposite in others.
 10 Q. Can't it make you apathetic, it kind of look like
 11 you have flat affect and make you want to sit on the couch and
 12 play video games, too; is that correct?
 13 A. That -- that can happen in some people, and so I
 14 guess the answer would be yes, but not everybody.
 15 Q. Now, you've also -- you were shown extensively the
 16 Timberlawn records while you were testifying on direct, and,
 17 again, you would agree with me that the psychiatrist out at
 18 Timberlawn did not diagnose Mr. Green with schizoid-affective
 19 disorder; is that correct?
 20 A. That is correct.
 21 Q. And he was there for four and a half days?
 22 A. I believe so, yes.
 23 Q. That's longer than seven hours that you spent with
 24 him; is that correct?
 25 A. That's correct.

1 Q. And we've gone through the -- the complaints -- and,
 2 again, this is a situation where Gary Green wasn't taken
 3 kicking and screaming in a straightjacket to Timberlawn, was
 4 he?
 5 A. I -- I believe that he checked himself in is what
 6 the records reflect.
 7 Q. He drove himself down there and checked himself in;
 8 is that correct?
 9 A. I believe so, yes.
 10 Q. And I'm -- I'm not remembering, Doctor. When you
 11 talked about your credentials and your experience, you just do
 12 some work on the civil side; is that correct?
 13 A. I do some work on the civil -- most of my practice
 14 is clinical. And then a percentage of my practice is -- is --
 15 involved in evaluating people in civil litigation, and then a
 16 very small percentage is in death penalty and capital murder
 17 cases.
 18 Q. Civil litigation, car wrecks, head -- closed head
 19 injuries, you do neuropsych tests and come in and tell a jury a
 20 guy, you know, is messed up to the tune of \$10 or \$500,000 -- I
 21 mean, you don't make them -- but you're coming in to try to
 22 tell a jury if he's hurt or not; is that correct?
 23 A. Yes. I'm not a life care planner, so I don't -- I
 24 usually don't talk too much about dollar amounts. I just --
 25 Q. I understand. I understand.

1 A. -- evaluate people to see if they have mental
 2 problems.
 3 Q. Have you ever done any work in the Social Security
 4 income disability arena?
 5 A. Very little. We -- we don't do that -- that much
 6 work with that. Occasionally I've evaluated a few people, but
 7 there are some people that specialize in that and do a lot of
 8 work in that and I -- I don't.
 9 Q. Do you know one way or the other, Doctor, if -- if
 10 you're awarded Social Security income disability from the
 11 government, if that is exempt from being garnished for child
 12 support?
 13 A. That, I do not know. I don't know about that.
 14 Q. And Mr. Johnson asked you -- I know it's tongue in
 15 cheek, but there was nowhere in the Timberlawn records where
 16 Gary Green walked in and stood in front of the admissions desk
 17 and said, I'm here for a crazy check. There's nothing in the
 18 records about that, is there?
 19 A. I don't recall seeing that.
 20 Q. I'm guessing if he did say that, that they probably
 21 would not have admitted him?
 22 A. I -- I really can't speak for what they would have
 23 done or not done at that point.
 24 Q. You talked about the symptoms, the conditions that
 25 Gary Green self reported once he was admitted to Timberlawn; is

1 that correct?
 2 A. Yes, I -- I believe we reviewed that.
 3 Q. Trouble sleeping, racing thoughts, you know,
 4 depression, those kinds of things; is that correct?
 5 A. Correct.
 6 Q. He's also complaining that he just was kind of tired
 7 of life, wanted to die, just wanted to go on with it; is that
 8 correct?
 9 A. That's correct. That's my impression.
 10 Q. And as a result of that, they placed Mr. Green on
 11 what's called close observation; is that correct?
 12 A. Yes.
 13 Q. That wouldn't surprise you when a patient comes in,
 14 is talking about killing himself, they've got liability so
 15 they're going to make sure that they keep a close eye on a
 16 fellow that's talking about killing himself while he's inside
 17 their perimeter?
 18 A. I'm sure they have policies and procedures for how
 19 they handle those circumstances that they have to follow.
 20 Q. Okay. And in the Timberlawn records -- and the jury
 21 can see -- see them if they want to -- I mean, they're
 22 monitoring him every 15 minutes 24 hours a day; is that
 23 correct?
 24 A. I -- I don't know if it was that much, but I know --
 25 I do know, though, that in -- that in those settings they do

1 monitor people pretty regularly.

2 Q. I'm showing you what's been admitted as State's

3 Exhibit 145, Doctor. Just for example here, we've got a flow

4 sheet; is that correct?

5 A. Yes.

6 Q. And it's got different codes about what's going on

7 in 15-minute intervals all the way throughout the day; is that

8 correct?

9 A. That's correct.

10 Q. Okay. And if you look at P, what's that a code for?

11 A. Sleeping.

12 Q. Sleeping. And 4 is where he's sleeping; is that

13 right?

14 A. Yes.

15 Q. So every 15 minutes the staff is coming in to make

16 sure that Gary Green is sleeping in his room?

17 A. It looks like that's what they're coding there, yes.

18 Q. So from midnight on the 22nd, all the way to at

19 least 7:45 that morning, Mr. Green at least is -- denoted in

20 the flow sheet as sleeping in his room?

21 A. It appears that way, yes.

22 Q. Let's see if we can go back to the day before and

23 see if Mr. Green went beddy-bye before that. It looks like he

24 went to sleep that night around 2200 -- be what, 10 o'clock?

25 A. Yes.

1 Q. So from 10 o'clock the night before until 7:45 that

2 next morning, this man that's having trouble sleeping is

3 sleeping?

4 A. That's -- that appears to be what's documented

5 there, yes.

6 Q. And he spends four and a half days there and checks

7 himself out; is that correct?

8 A. That was my understanding, yes.

9 Q. And when he checks himself out, there's a discharge

10 diagnosis?

11 A. Yes.

12 Q. Okay. And that discharge diagnosis was depression?

13 A. Yes, it was depression with psychotic features and a

14 rule out of bipolar.

15 Q. The psychotic features were he was talking about

16 killing himself?

17 A. The psychotic features probably refers to him -- him

18 having delusions that people are trying to harm him or hurt him

19 that were alluded to in the initial intake.

20 Q. And then you've also -- then once he's taken into

21 custody for the murders of his wife and his stepdaughter, he's

22 brought back to Parkland. You've seen those records; is that

23 correct?

24 A. Yes, I have, recently.

25 Q. And he's been in the jail here since September 22nd

1 of last year?

2 A. I believe, so, yes.

3 Q. And you've reviewed all those records, including his

4 mental health records up in the jail; is that correct?

5 A. Yes, I've reviewed them briefly since I've been

6 here.

7 Q. And are you surprised that nowhere in the Parkland

8 records since September 22nd of last year was Mr. Green

9 diagnosed with any kind of mental illness?

10 A. Again, it is a little surprising, but unless

11 somebody does a thorough, comprehensive psychological

12 assessment of Mr. Green, they're probably not going to have

13 enough information to provide a thorough diagnosis. So I'm not

14 fully surprised.

15 Q. Actually -- I mean, he has been diagnosed with some

16 kind of disorder. He's been diagnosed with adjustment

17 disorder; is that correct?

18 A. I believe I remember seeing that in the records,

19 yes.

20 Q. And he's being treated right now with an

21 antihistamine, an antihypertension medication, and an

22 antidepressant; is that correct?

23 A. Yes.

24 Q. Okay. Can you tell the members on the jury what is

25 the most commonly prescribed category of medication currently

1 going on here in the United States?

2 A. I'm not a physician, and so I really don't know the

3 answer to that question, unless -- unless, you know, I guess it

4 would be antidepressant medication.

5 Q. That's where I'm going. That's the most --

6 A. I have a lay -- lay knowledge of that. I mean, as

7 psychologists, we work with medication, but we try not to get

8 too involved in it.

9 Q. And you've told us your concerns with Mr. Green's --

10 his cognitive limitations and his intellectual low average to

11 even below that; is that correct?

12 A. Can you rephrase the question?

13 Q. You told us on direct about your opinions and --

14 concerning his intellectual capabilities, as well as his

15 cognitive limitations?

16 A. Yes, I did.

17 Q. Showing you a page from his Parkland jail records,

18 pointing right here, can you read that part about where he

19 generally talks about people judging others and is very

20 philosophical and analytical. He asked for a magazine in our

21 last discussion, Psychology Today?

22 A. Correct.

23 Q. So Mr. Green is up there reading Psychology Today in

24 the jail, or he's asking for it?

25 A. It sounds like he was, yes.

1 Q. And for the -- I mean, just for the jury's benefit,
2 what is adjustment disorder?
3 A. Adjustment disorder is -- it's a diagnosis that's
4 used when somebody is having emotional problems and reaction to
5 something. In other words, they're having difficulty adjusting
6 emotionally to a loss or a death or a stressful situation. It
7 has to occur for a certain length of time, and -- and it has to
8 not meet criteria for a depressive disorder or other emotional
9 disorder at that time. In other words, it doesn't fully meet
10 the criteria for depression, but the person is having some
11 emotional problems adjusting to something.
12 Q. An adjustment disorder, Doctor, is not a severe
13 mental illness, is it?
14 A. In most people it is not. It can become chronic and
15 severe in some people, but generally it's a -- it's in response
16 to stressors and it's not considered as severe as major
17 depressive disorder or schizophrenia or schizoaffective
18 disorder.
19 Q. And if you're a diehard Texas Ranger fan, there
20 might be some adjustment disorder issues going on right now
21 that may linger, you know, in the next week, maybe the next
22 month; is that right?
23 A. They're going to kick up the numbers on the
24 antidepressant medication.
25 Q. There you go. Doctor, the best I can tell in the

90
1 seven hours you spent with Mr. Green, you are the only human
2 being here on this earth in his over 20 years now in and out of
3 the jail system, going to Timberlawn, that's ever diagnosed him
4 with a severe mental illness. Would you agree with me?
5 A. No. Did you say except Timberlawn?
6 Q. Yes.
7 A. Okay. It appears to be from the records that I have
8 that he's never been diagnosed with a severe mental illness;
9 that's correct, except for Timberlawn.
10 Q. And do you know whether or not Mr. Green did, in
11 fact, as soon as he left Timberlawn, put in his application for
12 Social Security income disability?
13 A. I -- I remember hearing that somewhere or reading
14 that somewhere recently, so -- so I guess the answer would be,
15 yes, I believe so, but I'm not sure.
16 Q. Now, we talked to you -- today is Thursday, right?
17 A. Yes.
18 Q. We talked to you Tuesday afternoon; is that correct?
19 A. That's correct.
20 Q. And that was outside the presence of the jury; is
21 that right?
22 A. That's correct.
23 Q. And we were able to elicit what opinions you had
24 formed as of Tuesday afternoon; is that correct?
25 A. That's correct.

91
1 Q. And you told us Tuesday afternoon under oath that
2 you did not think Gary Green met the antisocial personality
3 disorder criteria; is that correct?
4 A. That's correct.
5 Q. And let's just start with -- the antisocial
6 personality disorder criteria; they're found in the DSM-IV; is
7 that correct?
8 A. That's correct.
9 Q. Tell the folks of the jury what the DSM-IV is.
10 A. The DSM-IV is the Diagnostic and Statistical Manual
11 of Mental Disorders. It's basically the reference book that
12 most mental health clinicians, psychiatrists, psychologists,
13 school counselors and so forth, use to diagnose and classify
14 and categorize the mental disorders and behavioral disorders
15 that people have. So in other words, it's the reference book
16 that everybody looks at that tells you how to diagnose people
17 and what's required to diagnose somebody.
18 Q. And just give me ballpark. How many -- in the year
19 2010 now, how many different clinical diagnoses are in the
20 DSM-IV?
21 A. Oh, boy.
22 Q. Hundreds?
23 A. Yeah, probably. Yeah, maybe -- maybe over a
24 hundred. If you break up all the subcategories and things like
25 that, it will probably be in the hundreds.

92
1 Q. And do you know when the first DSM was -- was
2 published?
3 A. I think the first DSM was published -- maybe in
4 1952. There was obviously a I, a II, a III, a IV. Then
5 there's been a text revision in 2000, and then the V is coming
6 out in 2013. I know that's more than what you asked, but
7 that's my understanding of the time line.
8 Q. So depending on what you believe, for 3000 years,
9 the world operated without any kind of DSM; is that correct?
10 A. Yes, I believe so.
11 Q. Okay. And that means there wasn't anything called
12 schizo -- schizoid-affective before 1952?
13 A. It hadn't been labeled, and I think actually
14 schizoaffective came later than that, so it's probably in the
15 version III or IV, so probably not until the 1980's or 90's is
16 when schizoaffective became to be understood.
17 Q. Did you -- agree with me, Doctor, there are just
18 some -- just mean people in the world?
19 A. Yes.
20 Q. Mean people without any kind of severe mental
21 illness?
22 A. Yes. Those people would be antisocial, uh-huh.
23 Q. Mean people who are capable of doing just hideous,
24 monstrous acts; is that correct?
25 A. We see -- we see it every day in the news,

1 unfortunately, yes.

2 Q. And if one of those really mean people walks into

3 your office -- into your clinical practice and says, Doc, I'm

4 just a mean, lazy, son of a gun, I need you to treat me --

5 A. Uh-huh.

6 Q. -- could you bill an insurance company for that?

7 A. Could I bill an insurance company for -- for that?

8 Well, we -- we would have to figure out what was really wrong

9 with the person, you know, and -- and depending on what's

10 really wrong with them, then, you know, some of the -- some of

11 the things are covered by insurance and some of them aren't.

12 Q. But you can't bill an insurance for somebody that's

13 just mean, can you?

14 A. For somebody who's just mean?

15 Q. Right.

16 A. Well, if the person is having interpersonal problems

17 as a result of their behavior -- in other words, they have a

18 behavior problem or a personality disorder that causes them to

19 be mean and to have problems in their relationships with other

20 people, actually a lot of insurance companies will pay

21 for that -- will pay for therapy for that.

22 Q. You can't -- you can't write the insurance company

23 and say, this guy is just mean. You've got to have one of

24 those clinical diagnoses to reference before they're going to

25 pay you, right?

94

1 A. Well, if you say a guy is just mean, then it would

2 show that you don't have the training and experience in order

3 to be able to interpret the person's real problems.

4 Q. Okay. You told us that if they are just plain mean,

5 that would correlate to be -- being antisocial; is that

6 correct?

7 A. Well, that would be one -- a lay person's

8 description of a behavior of somebody who might be antisocial,

9 yes.

10 Q. Let's talk about the clinical or the DSM-IV criteria

11 for antisocial personality disorder.

12 A. Okay.

13 Q. The first thing you've got to be able to show is --

14 MR. BEACH: Judge, I'm sorry.

15 Q. (BY MR. BEACH) There's evidence of conduct disorder

16 with onset before age 15; is that correct?

17 A. Yes, but that's not the first thing. Are we missing

18 the first part?

19 Q. I want to start -- we'll go -- we'll go to --

20 A. Okay. So we're going to go --

21 Q. -- 15 after this.

22 A. Go in reverse. Okay.

23 Q. I want to take it chronologically.

24 A. Okay.

25 Q. So you've got to have evidence of conduct disorder

1 with onset before age 15?

2 A. Yes.

3 Q. And do we have that in this case?

4 A. Again, I didn't have all of the information that I

5 needed, but -- but as -- as I sit here and learn more about Mr.

6 Green's behavior, it does appear that he had conduct problems

7 before age 15, so I'm a little uncomfortable saying yes for

8 sure, because I'm not an expert in that area either and I don't

9 evaluate to an in depth extent, but it does appear that there

10 were some problems with conduct.

11 Q. Doctor, I'm going to show you what's been marked for

12 identification as State's 165, and are you familiar with

13 State's 165?

14 A. Yes, I am.

15 COURT REPORTER: Oh, I'm sorry. It needs to be

16 167.

17 (Discussion off the record.)

18 Q. (BY MR. BEACH) We'll start over.

19 A. Okay.

20 Q. Showing you what's been marked as State's

21 Exhibit Number 166. Are you familiar with State's 166?

22 A. Yes, I believe so.

23 Q. Is this information that was supplied to you by

24 Kelly Goodness who was working for the Defendant in this case?

25 A. Yes.

96

1 Q. And that was supplied to you back in January of

2 2010?

3 A. That's correct.

4 Q. And you've reviewed the contents of State's 166?

5 A. Yes, I have.

6 Q. And did they help you in forming your opinions in

7 this case?

8 A. Well, that was a letter -- the referring letter that

9 specified what I was being asked to do in this case.

10 Q. Also, with her summaries of interviews contained --

11 attached to your matching orders, basically?

12 A. Yes, the -- the first two pages are the referral

13 letter asking me what to do, and the -- it looks like the next

14 six pages after that are -- is some of the information that was

15 provided to me from Dr. Goodness's office regarding interviews

16 and history for the subject that was to be interviewed.

17 Q. And you relied on those interview summaries; is that

18 correct?

19 A. That is correct.

20 MR. BEACH: We'd offer State's 166 at this time,

21 Your Honor.

22 (State's Exhibit 166 offered.)

23 MR. JOHNSON: No objection.

24 THE COURT: It's admitted.

25 (State's Exhibit 166 admitted.)

1 Q. (BY MR. BEACH) As part of the interview summaries
 2 provided to you by Dr. Goodness -- and she's -- she's here in
 3 the courtroom today, the lady in the front row with the dark
 4 hair; is that correct?
 5 A. That's correct.
 6 Q. And she's also a psychologist here in the Metroplex?
 7 A. Yes.
 8 Q. Apparently the Defendant's brother, Nysasno Carter,
 9 was interviewed. Are you aware of that?
 10 A. Yes, I am.
 11 Q. You've also talked to him in person; is that right?
 12 A. Yes, I talked to him over the telephone.
 13 Q. You see that highlighted area there?
 14 A. Yes.
 15 Q. Mr. Carter reported that the Defendant and he had
 16 two dogs together as children, and Mr. Green and a friend
 17 Marcus set fire to the dogs; is that correct?
 18 A. That's correct.
 19 Q. Now, would that help you in making your
 20 determination as to whether or not Mr. Green exhibited conduct
 21 order behavior just before age 15?
 22 A. Yes, I would be interested to know whether that was
 23 due to psychosis or whether --
 24 Q. I didn't ask you what it was due to. Would that
 25 help you in -- in --

1 A. It would be an important piece of information, yes.
 2 Q. Cruelty to animals by individuals before age 15,
 3 that's a big one, isn't it?
 4 A. That is a symptom that is exhibited by children with
 5 conduct disorder; that's correct.
 6 Q. And, also, I guess you've learned either here in the
 7 courtroom or from other additional records that Mr. Green had
 8 truancy issues; is that correct?
 9 A. That's my understanding, yes.
 10 Q. That he began smoking marijuana at age 12 which is a
 11 violation of the criminal law; is that correct?
 12 A. Yes.
 13 Q. So you would agree with me that Mr. Green has
 14 exhibited behavior of conduct disorder before age 15?
 15 A. Yes.
 16 Q. So that criteria -- criterion is met?
 17 A. There is evidence for that criteria, yes.
 18 Q. Now, let's go to the part that you were talking
 19 about. We have to find three of the following -- yeah, three
 20 of -- yeah, we'll take it back a little bit -- the following
 21 categories within -- to conclude your -- your diagnosis as to
 22 antisocial personality disorder; is that correct?
 23 A. That's correct.
 24 Q. The first is failure to conform to social norms with
 25 respect to lawful behaviors as indicated by repeatedly

1 performing acts for grounds for arrest. No question Mr. Green,
 2 he aced that -- that first criteria?
 3 A. Yes.
 4 Q. Deceitfulness is indicated by lying, use of alias,
 5 or conning others for personal profit or pleasure. Do you have
 6 any evidence of that?
 7 A. I -- I didn't have specific evidence of that, and --
 8 when I conducted by assessment and -- and I can't think of any
 9 right now. I guess I'm just not sure.
 10 Q. I want you assume with me, Doctor, that Mr. Green
 11 did go through that exercise at Timberlawn to start the process
 12 of -- of obtaining money from the government, okay? I want you
 13 to assume with me that that's a truism, okay?
 14 A. Okay.
 15 MR. JOHNSON: Judge, I object to that because
 16 there's absolutely no evidence of that -- that being a factor.
 17 That's assuming facts not in evidence, not proven by any
 18 testimony in the case.
 19 MR. BEACH: I'm just setting up my hypothetical,
 20 Judge.
 21 THE COURT: Well, call it a hypothetical rather
 22 than a truism. That's -- that's not -- call it a hypothetical.
 23 Q. (BY MR. BEACH) That's why I said to assume it.
 24 But, yeah, consider this a hypothetical. That's why he went to
 25 Timberlawn, okay?

1 A. Okay.
 2 Q. And that would be to -- for his personal profit -- I
 3 mean, if he was going to get a check from the government,
 4 that's something that -- if he went there to lie about that and
 5 set that up, that would be for his personal profit?
 6 A. If a -- if a person faked having psychiatric
 7 symptoms and checked themselves into a psychiatric hospital for
 8 five days for personal profit, yes, that would be a pretty
 9 major lie -- attempt to lie.
 10 Q. And you reviewed the Timberlawn records; is that
 11 correct?
 12 A. Yes, I have.
 13 Q. And one of the things that Mr. Green was claiming in
 14 the Timberlawn records is he had been sexually abused as a
 15 child; is that right?
 16 A. That is correct.
 17 Q. He also claimed that he was laid off of his job a
 18 month before at Timberlawn; is that correct?
 19 A. I -- I believe so. I don't remember all of the
 20 details off the top of my head, but that sounds reasonable.
 21 Q. And if Mr. Green was not laid off, but if he just
 22 voluntarily quit his job, that would be a lie; is that right?
 23 A. If he said he was laid off, but he really quit his
 24 job, then, yes, that would be a -- an untruth.
 25 Q. Patient told that he was sexually molested by his

1 aunt, mother's sister, when he was three years old, and he
 2 never told anyone except his mother when he was age 17. His
 3 mom told him he was most likely mistaken, and he has never
 4 mentioned it again. That's in the Timberlawn records. Do you
 5 recall that?
 6 A. I recall reading something about that, and he told
 7 me the same thing in my interview with him.
 8 Q. You were sitting in here yesterday when Gary Green's
 9 mother testified; is that right?
 10 A. Yes.
 11 Q. And Gary Green's mother testified under oath that
 12 was all news to her, she had never heard anything about Gary
 13 coming to her saying that he had been sexually abused by one of
 14 her sisters?
 15 A. I believe that's what she testified to, yes.
 16 Q. So if you believe her, Gary is lying at Timberlawn
 17 about something, I guess, that's causing him stress?
 18 A. I would suppose so, yes. There's some inconsistency
 19 there.
 20 Q. Number three, impulsivity or failure to plan ahead.
 21 He's all over that one, isn't he?
 22 A. When I -- when I evaluated him, I didn't see a lot
 23 of evidence for impulsivity during the assessment, but usually
 24 people with criminal histories do have problems with
 25 impulsivity.

1 Q. Irritability and aggressiveness as indicated by
 2 repeated physical fights or assaults. And we've heard about
 3 how he treated his girlfriends and --
 4 A. Yes. There -- there's evidence for that in his
 5 history.
 6 Q. Reckless disregard for safety of self or others?
 7 A. Yes, obviously, there's record of that in his
 8 history, as well.
 9 Q. Consistent irresponsibility as indicated by repeated
 10 failure to sustain consistent work behavior or honor financial
 11 obligations?
 12 A. That -- there was -- there was some allusions to
 13 that in the information that I've had so far. It wouldn't
 14 surprise me.
 15 Q. Okay. And finally, lack of remorse as indicated by
 16 being indifferent to or rationalizing, having hurt, mistreated,
 17 or stolen from another. There's certainly evidence of that; is
 18 that correct?
 19 A. That was something that I -- that I had questions
 20 about in my clinical -- in developing my clinical opinions
 21 regarding the Defendant because it seemed like Mr. Green was --
 22 when I -- when I was speaking with him at least, I felt like he
 23 was being -- like he did have some remorse, or at least he was
 24 expressing remorse. And so -- so, you know, people who don't
 25 have any remorse, they typically not -- don't get depressed by

1 their behavior, the things that they do, they don't brood on
 2 it, they forget about it, and they move on. And it seems like
 3 Mr. Green was thinking about things a lot and brooding over
 4 things. So -- so I'm not sure about that one on -- from what
 5 I've seen.
 6 Q. Well, I mean, the first step in true remorse is
 7 accepting responsibility. Wouldn't you agree with me?
 8 A. Yes, sure.
 9 Q. So if he's telling his mother and his brother that,
 10 you know, his wife came at him with the knife and somehow he
 11 was able to miraculously get the knife away from her and start
 12 stabbing at her and then the wife picked up the baby and then
 13 that's how the baby got stabbed, that wouldn't be accepting
 14 responsibility, would it?
 15 A. Well, we're kind of getting into an area that I'm
 16 not an expert in, you know. And so I -- I didn't really do
 17 that much of an assessment regarding that. So I guess I should
 18 be a little more careful about talking about actual remorse and
 19 things like that.
 20 Q. Now --
 21 A. I -- I haven't seen a lot of evidence for a lack of
 22 remorse, but it wouldn't surprise me if it's there.
 23 Q. You read the five and a half page letter that Mr.
 24 Green wrote to his wife right before he murdered her and the --
 25 A. Yes, I did.

1 Q. Where he's talking about he's the victim?
 2 A. Yes.
 3 Q. It's all her fault?
 4 A. Yes.
 5 Q. Because she wanted to put him out?
 6 A. I believe so, yes.
 7 Q. Finally, Doctor, your marching orders from Kelly
 8 Goodness included not to discuss the alleged offense with the
 9 Defendant; is that correct?
 10 A. That's correct.
 11 Q. So you didn't talk to the Defendant about the crime
 12 itself?
 13 A. That's correct.
 14 Q. You were not provided by the defense, for instance,
 15 the videotaped hour and a half confession taken within 12 hours
 16 of the murder of Mr. Green?
 17 A. No, I was not provided that.
 18 Q. You didn't ask for that?
 19 A. I did not.
 20 Q. You didn't think that would help you in forming your
 21 opinions as to whether or not Mr. Green had a mental -- mental
 22 illness?
 23 A. I was -- I was asked -- the referral question was to
 24 evaluate him without any reference to the crime. And so I
 25 wasn't allowed to have that information, and I did not require

105

1 it because I agreed to evaluate him without reference to the
 2 crime. I'm not a forensic psychologist.
 3 Q. What does forensic psychology mean?
 4 A. Forensic psychology is the study of all the mental
 5 aspects of -- of criminality and the law. For example, a
 6 forensic psychologist can specialize in things like future
 7 dangerous or culpability or insanity, whether somebody was --
 8 knew right from wrong at the time that they committed an
 9 offense. It's a very specialized area that people need
 10 training and experience in order to be able to conduct. I'm a
 11 clinical neuropsychologist. My job is to diagnose people with
 12 mental conditions and mental disorders, but I do very little
 13 legal work, and I don't have extensive training and experience
 14 in it, as you can probably tell.
 15 Q. We're here in a courtroom today, though, right?
 16 A. Yes, we are.
 17 Q. It doesn't get any more forensic than being here in
 18 the punishment phase of a death penalty case, does it?
 19 A. It's pretty intense for me.
 20 Q. You're telling these folks that you're not here to
 21 offer any opinion as to whether or not Mr. Green's so-called
 22 schizoid-affective severe mental illness had anything to do
 23 with what happened on September 21st, 2009?
 24 A. That is correct. I'm just saying that he's -- that
 25 he's mentally ill. I'm not saying that that's what caused him

106

1 to do that.
 2 Q. And how much an hour are we paying you to come in
 3 here and say that?
 4 A. I don't know yet. I -- I haven't determined how
 5 much I bill, but I -- I would imagine it's going to be
 6 something like around \$200 an hour or something like that.
 7 Q. You don't have a standard rate?
 8 A. I don't have a standard rate. I don't do this often
 9 enough and haven't really developed one yet for this. I -- I
 10 do have a standard rate for -- for my civil work, but I haven't
 11 figured out what the Court will pay me to come here.
 12 Q. It's a heck of a lot more intense than a car wreck
 13 case, isn't it?
 14 A. It's a lot more intense, yeah. But -- but I don't
 15 think I'm going to get paid as much as I do in those cases.
 16 Q. And you've met Randy Price; is that correct?
 17 A. Yes, I have. I've met Dr. Price.
 18 Q. And he's -- is he still here? Okay. He's sitting
 19 here in the front row in the brown tie.
 20 A. Yes.
 21 Q. And he's a board certified forensic psychologist?
 22 A. I -- I believe so. I -- I don't really know very
 23 much about his training and certification.
 24 Q. And he's up here in the Dallas area; is that right?
 25 A. That is correct, I do know that.

107

1 Q. Doctor, do you have any idea why Kelly Goodness had
 2 to go all the way to San Antonio to find an expert to come in
 3 here and say that Mr. Green had a severe mental illness?
 4 A. Well, people in my field, we -- there aren't very
 5 many of us around that work in the public sector. And, for
 6 example, in San Antonio, there's maybe about four people that
 7 do what I do. And a lot of them won't take legal work because
 8 of all of this. I've been here for three days now, and all of
 9 my patients -- I've had to reschedule and things like that, so
 10 I would assume it's a similar situation here in Dallas where
 11 it's hard to find a neuropsychologist who is willing to take
 12 the time to do this, and also to be put up on the stand and
 13 questioned like this and so forth. You know, there's not very
 14 many neuropsychologists that are willing to do that.
 15 Q. Would you be surprised, Doctor, there are
 16 approximately 20 full-time forensic psychologists here in the
 17 Metroplex that do this for a living full time?
 18 A. I wouldn't be surprised. Dallas is a pretty big
 19 area.
 20 MR. BEACH: I appreciate your patience with me.
 21 And I'll pass the witness, Judge.
 22 THE WITNESS: Okay. Thank you.
 23 REDIRECT EXAMINATION
 24 BY MR. JOHNSON:
 25 Q. Doctor, the last question Mr. Beach just asked you,

108

1 I guess he's still confused about the terminology. He's
 2 talking about forensic psychologists. We're talking about
 3 neuropsychology, are we not?
 4 A. That's what I believed we were talking about, yes.
 5 Q. Okay. When he asked about how many forensic
 6 psychologists are in -- in Dallas, that has nothing to do with
 7 the amount of neuropsychologists that are even within the State
 8 of Texas that are willing to take on these kind of diagnoses;
 9 is that correct?
 10 A. I would imagine that for neuropsychology, the number
 11 is going to be a lot lower than 20. I -- I don't think that
 12 there would be that many.
 13 Q. Again, there's a lot of people that won't accept any
 14 kind of this stuff because of the time that it puts on your
 15 practice; is that right?
 16 A. That's correct.
 17 Q. And when we talk about the diagnoses or the -- the
 18 referral letter Mr. Beach has alluded to, that's -- you
 19 understand what you were asked to do, and that was to find out
 20 for evidence of a mental illness?
 21 A. That's correct.
 22 Q. Is there any doubt whatsoever in your mind, sir,
 23 that Gary Green is -- has a severe mental illness?
 24 A. No, there's no doubt that he's mentally ill. He
 25 is -- he's very mentally ill.

109

1 Q. And in fact, as Mr. -- Mr. Beach has gone over some
2 of the symptomatologies of -- of -- that would fit in the
3 criteria to -- for a diagnoses of antisocial personality
4 disorder. That is not something that you were asked to do in
5 particular because ASPD is a behavioral disorder, correct?
6 A. That's correct.
7 Q. And behavioral disorder is -- we were asking for you
8 to find evidence of behavioral disorders in context of mental
9 illness; is that correct?
10 A. That's correct.
11 Q. Okay. So he's asking you to compare apples to
12 oranges in a way here, is he not, if he's saying that you just
13 ignore one thing. We're asking you to look at -- for the big
14 picture of mental illness.
15 A. Yes. That's correct, and -- and you really can't
16 separate them all apart. You know, people suffer from
17 comorbidity, and so they suffer from a lot of different mental
18 conditions.
19 Q. Right. And when he -- and I guess he's -- he's
20 making reference -- he made references to several things here.
21 Let's go through a couple of them. This -- his -- you
22 understand when he talks to you about, do you understand that
23 the Defendant applied for SSDI. Do you remember him -- he
24 mentioned that?
25 A. Yes, I do remember that.

110

1 Q. And you said that you think you have heard that or
2 saw that somewhere here in the last few days?
3 A. I -- I don't remember specifically. I --
4 Q. I'm guilty.
5 A. Okay.
6 Q. You don't remember me and you talking about it back
7 there that Mr. Beach was going to be questioning you about all
8 of his -- his theories of this case?
9 A. There's been a lot going on in the last three days,
10 and, yes, I guess I would say that I do remember that.
11 Q. Okay. So his -- and you understand -- and you
12 understand that as he's questioning you here today, his theory
13 is --
14 MR. BEACH: Judge, I'm going to object to what
15 my theory is. It's in the -- it's in the evidence that he
16 applied, so I'm going to object to the form of the question.
17 It's an attack on me personally.
18 THE COURT: Object to the form -- form of the
19 question. Rephrase your question, please.
20 Q. (BY MR. JOHNSON) When Mr. Beach questioned -- when
21 Mr. Beach asked you about that, sir, did you -- did you
22 understand that to be for a particular reason that he was
23 asking you that question?
24 A. Okay.
25 Q. I'll withdraw that for right now.

111

1 Let me -- let me go to -- let me go to another
2 point first.
3 A. Okay.
4 Q. Do you remember when he asked you about the question
5 about can you bill an insurance company just because a fellow
6 is mean?
7 A. That was an unusual question, yes.
8 Q. Do you think maybe that might have something to do
9 with his theory that the only reason that Timberlawn diagnosed
10 him with something was because they wanted to bill the
11 insurance?
12 MR. BEACH: Same objection to form, Your Honor.
13 MR. JOHNSON: Judge, I think it's a fair
14 question.
15 THE COURT: That's overruled.
16 Q. (BY MR. JOHNSON) Do you think it -- you think it
17 might have anything to do because that's Mr. Beach's theory in
18 this case?
19 A. Well, you know, it does -- it does seem to be the
20 case that -- that there may have been -- he's trying to present
21 the argument that he was hospitalized for disability.
22 Obviously, anybody can see that, and so -- so I guess the
23 answer would be yes.
24 Q. Let me ask you something, Doctor. If you think that
25 a fellow was going to go to a mental hospital and check himself

112

1 in, do you think if he was looking for a surefire way to get
2 SSDI, that he probably wouldn't (sic) come up with some greater
3 symptoms than what Gary Green is down there describing?
4 A. Well, I don't think somebody would go to that extent
5 and do it that way. There's a lot easier ways to get Social
6 Security disability, and then also, I don't -- these symptoms
7 are consistent with what I've observed clinically and what's
8 been observed clinically in other places and what his family is
9 reporting, so I -- I -- I guess if we have to use the word
10 "theory," I don't really buy into that theory at all myself
11 personally. I really think that he was having a mental and
12 emotional breakdown at the time and that's why he sought
13 treatment. He was hospitalized for a while. He didn't enjoy
14 the hospital experience and -- and signed himself out which is
15 not unusual in psychiatric hospital type settings. People sign
16 themselves out pretty quick usually, if they go in.
17 Q. And if you -- if you want to go down there and --
18 and really paint the case for your crazy check -- I mean, you
19 can paint feces on the wall. You can stand on your head naked.
20 You can do a whole lot better than just telling people that I
21 think the world would be -- it would be a better thing for me
22 if I was dead.
23 A. I -- I think --
24 Q. I mean, it seems to be -- it seems to be a minor
25 report of symptomatologies, if it's for the purpose of getting

1 yourself a crazy check, doesn't it?

2 A. It would be extremely unusual. I -- I've never seen
3 anything to that extent before --

4 Q. Okay.

5 A. -- that way, and so, yeah, I don't think so.

6 Q. Okay. And, again, when we asked you to do this
7 diagnosis for the purpose of mental illness -- and -- and
8 Timberlawn -- I mean, but apparently from all the records
9 you've reviewed, when Gary Green was at Timberlawn, he saw
10 several psychiatrists, did he not?

11 A. I believe so, yes.

12 Q. And these psychiatrists diagnosed him with a severe
13 mental illness; is that correct?

14 A. That's correct.

15 Q. Is schizoaffective disorder bipolar type, is that
16 somehow a better mental illness than major depressive disorder?

17 A. No. There's actually going to be more impairment
18 associated with schizoaffective disorder than there is with
19 simple major depressive order.

20 Q. Did I come to you and say, Doctor, could you try to
21 beef up this little -- this -- this major depressive order
22 recurrent with psychotic episodes? Did I tell you we needed
23 something a little fancier than that for trial?

24 A. No, nobody told me to do that.

25 Q. And Mr. Beach questioned you earlier about these --

114

1 about this dichotomy between being diagnosed and treated in an
2 institutional setting.

3 A. Yes.

4 Q. And you alluded to that. Would you tell me -- would
5 you tell us again why it doesn't surprise you that when Gary
6 Green is either sitting in the penitentiary or sitting in the
7 jail, that he's not being diagnosed and treated for a
8 recognized mental type of an illness?

9 MR. BEACH: Judge, wait a second.

10 THE COURT: I don't understand the question.

11 MR. BEACH: He's not qualified -- he said he's
12 not a forensic psychologist. How -- how could he answer that?

13 MR. JOHNSON: Mr. Beach -- No, Mr. Beach asked
14 him if he was surprised he hadn't been diagnosed.

15 MR. BEACH: Talking about the penitentiary
16 setting, though. That takes specialized expertise apparently
17 that he doesn't have. He's a clinical psychologist.

18 Q. (BY MR. JOHNSON) Let's do this, then, Doctor. You
19 and I have gone over his prison records; is that correct?

20 A. Yes.

21 Q. And you remember awhile ago Mr. Beach told you,
22 well, he was in prison, he may have complained a little bit
23 about a little bit of insomnia and a little bit of stress.
24 Remember him asking you that question?

25 A. Yes, I do.

1 Q. I'm going to ask you --

2 MR. JOHNSON: What number is the TDC records?

3 (Discussion off the record.)

4 Q. (BY MR. JOHNSON) Okay. I'm going to show you some
5 portions out of the -- what's been marked and admitted for --
6 as State's Exhibit 103. I want to talk to you about some --
7 some of the psychiatric notes from the Defendant while he was
8 in the penitentiary. Do you see where the Defendant is in
9 there and he's being -- there being treated for depression?

10 A. Yes. It says he was angry and depressed.

11 Q. Do you -- these are -- these are in different years.

12 Do you see where he's -- can you tell me what he's being
13 treated for in this instance?

14 A. Yes. On September 20th, 1994, he's having a nervous
15 breakdown, saying no one cares, has been thinking about hurting
16 someone. And I can't -- I can't see --

17 Q. In the fields?

18 A. In the fields.

19 Q. Okay. He's in there having a nervous breakdown, and
20 he's exhibiting the same symptomatology that you've
21 described; is that correct?

22 A. Yes.

23 Q. Can you -- can you read to the jury this other
24 report on a different occasion?

25 A. On August 19th, 1994, it says he's had thoughts of

116

1 killing himself.

2 Q. Okay. Does he talk about in 1995 that -- become
3 closed off from the rest of the people and says he's going to
4 join the French Foreign Legion?

5 A. Yes.

6 Q. Does that make a lot of sense, Doc?

7 A. No, not really -- not when you're imprisoned for
8 that long.

9 Q. And -- and he's in there -- and he's in there
10 talking about -- he's in there talking about killing himself.
11 That's a little bit more than a little insomnia, isn't it, Doc?

12 A. Yes, it is, and I would attribute that to -- and I'm
13 not a forensic psychologist, so I don't know how prison systems
14 work, but I do know from my own personal experience and working
15 in many types of hospitals and clinical settings over the
16 years, that there's different levels of assessment and
17 different standards for assessment. There's certainly a big
18 difference between sort of observing somebody for a few
19 minutes, asking them a few questions, and writing something
20 down, as opposed to doing a more comprehensive assessment that
21 involves testing and evaluating records.

22 In other words, there's -- you can -- you can,
23 you know, do an X-ray or you can do an MRI. The MRI is going
24 to give you a lot more information than an X-ray. And so --
25 so, you know, in a lot of these cases I suspect he was just

117
 1 getting a simple X-ray that really wasn't going to find the
 2 tumor, for example, that an MRI would find if you went into a
 3 lot more detail and more in depth, you know. Out of all the
 4 evaluations that I can see, I'm confident that mine has been
 5 the most thorough of any evaluation that's been done with Mr.
 6 -- with Mr. Green so far.
 7 Q. And when you were talking about the comparison you
 8 were given a moment ago as to the MRI, as opposed to maybe
 9 simple X-ray, the prosecutor came to you and showed you a piece
 10 of paper stating the Defendant was tested in the penitentiary
 11 and they say his I.Q. was 105. You said that absolutely
 12 surprised you; is that correct?
 13 A. Yes.
 14 Q. Do you believe that the -- that Gary Green was
 15 tested in the penitentiary to the extent of the
 16 neuropsychological testing and cognitive testing that you
 17 performed upon him?
 18 A. Well, as I mentioned earlier, there's very --
 19 there's -- there's hundreds of different types of I.Q. tests.
 20 Some of them will ask you three questions, and if you can
 21 answer those, it will give you an I.Q. score, on the internet,
 22 for example. So I really need to know what tests was used
 23 before I can rely on that -- on that score or comment on that
 24 score.
 25 Q. And Mr. Beach asked you about your knowledge at

118
 1 Timberlawn, and that's a facility here in the Dallas area; is
 2 that correct?
 3 A. That's my understanding, yes.
 4 Q. And they know that several of the doctors over there
 5 at Timberlawn, when they evaluated him, interviewed him, that
 6 they are aware that they all diagnosed Gary Green with a severe
 7 mental illness; is that correct?
 8 A. Yes, it has both mood and thought disturbance.
 9 Q. Okay. And so I guess if you were -- if you're going
 10 to try to convince -- convince a bunch of people to execute or
 11 to put a man to death for something -- for doing something and
 12 they disagree with what these people are diagnosing him with, I
 13 guess they could call them down here and -- and pick them apart
 14 what they diagnosed him with, could they not?
 15 A. I suppose so.
 16 Q. There's -- there's not really -- in regards to being
 17 severe mental illness, major depressive disorder is an Axis I
 18 diagnosis, the same as schizoaffective; is that correct?
 19 A. And it can be severe in some people, especially once
 20 a person gets to where they have psychotic features, and that
 21 falls into the severe category; the diagnostic category is
 22 major depressive disorder, severe with psychotic features.
 23 That's the way that it's supposed to be coded. They coded part
 24 of the diagnosis, but they didn't code the number and -- and
 25 the actual descriptor on there.

119
 1 Q. And -- and, Doctor, is there -- is there any doubt
 2 whatsoever in your mind as you're sitting here in this
 3 courtroom testifying to this jury today that Gary Green is a
 4 severely mentally ill man?
 5 A. No, I think there's an overwhelming amount of
 6 evidence that he is mentally disturbed and that he is -- that
 7 he has a severe mental disorder.
 8 Q. And the prosecutor in his final question to you
 9 awhile ago was you can't sit here and say that he did this
 10 killing simply because he's mentally ill? You can't say that,
 11 can you?
 12 A. I can't -- I can't say anything about why he would
 13 kill somebody.
 14 Q. There's not anybody that's going to be able to say
 15 exactly why. That's just somebody else's theory, isn't it?
 16 A. I -- I don't know of anybody who can explain why a
 17 person would do something like that. It's -- you know, people
 18 with expertise can try to explore that, but I don't have that
 19 kind of expertise, and I don't really know of anybody who could
 20 really tell you.
 21 Q. They may have an opinion?
 22 A. Yes.
 23 Q. Or a theory?
 24 A. Yes.
 25 Q. But opinions and theories are just as good as the

120
 1 people that formulate them, aren't they?
 2 A. I -- I suppose so, yes.
 3 Q. And I -- they pointed out Dr. Price here; is that
 4 correct?
 5 A. Yes.
 6 Q. And he's a fellow that's been feeding them all the
 7 letters or the notes --
 8 MR. BEACH: Judge, I'm going to object to the
 9 form of the question.
 10 THE COURT: Sustained.
 11 Q. (BY MR. JOHNSON) Well, have you seen him passing
 12 notes back up to the prosecutors to hand to Mr. Beach so he can
 13 think of things to ask him?
 14 MR. BEACH: I'm sure they're really concerned
 15 about him passing me notes. I'm going to object. It's outside
 16 the record.
 17 THE COURT: All right. You referenced -- you've
 18 referenced their experts, too. What's good for the goose is
 19 good for the gander. I think that's in the book somewhere,
 20 too.
 21 MR. BEACH: Very good.
 22 A. So, yes, I did observe them pass notes.
 23 Q. (BY MR. JOHNSON) Doctor, I think that's all the
 24 questions I have for you at this time. Thank you.
 25 THE COURT: Recross.

RECROSS-EXAMINATION

1 BY MR. BEACH:

2 Q. And, Doctor, as you sat in that chair Tuesday, you

3 told me flat out under oath that Gary Green was not antisocial;

4 is that correct?

5 A. Yes, and I may have --

6 Q. That's a yes or no. You told me that. He can come

7 back and get you to explain it.

8 A. Sure. Yes.

9 Q. You told me that. Sitting in here yesterday, that

10 changed your mind; is that correct?

11 A. Over the last couple of days sitting in here and

12 reviewing records -- yes, more records -- changed my mind.

13 Q. And why it's so important, Doctor, is -- I mean, the

14 corner -- one of the cornerstones, linchpins of that antisocial

15 personality disorder is someone who is a deceitful,

16 manipulative, conscienceless individual; is that correct?

17 A. That's correct, and that's one of my concerns in

18 diagnosing him with antisocial.

19 Q. And how that plays into this case, when he checks

20 himself into Timberlawn, even though they're professionals, who

21 are they relying on to make that diagnosis?

22 A. They're relying on their clinical expertise. A

23 psychiatrist -- it's hard to fool a psychiatrist.

24 Q. Who's giving them the information?

25

1 A. They're -- they're -- they're taking an oral

2 history, but they're also observing the patient visually and

3 getting -- making clinical impressions based on what they're

4 seeing in the patient.

5 Q. Who are they getting the oral history from?

6 A. From the patient usually.

7 Q. From Gary Green, the deceitful, manipulative,

8 antisocial personality disorder individual; is that right?

9 A. "Deceitful" and "manipulative" are terms that people

10 use. I'm a clinician. I -- I don't really think in terms

11 of -- and that wasn't what I was called here to do, so I can't

12 say yes to that because you're -- there's a lot in there that

13 -- that I don't have any mandate to opine on.

14 MR. BEACH: That's all I have.

15 FURTHER DIRECT EXAMINATION

16 BY MR. JOHNSON:

17 Q. And when Mr. Beach keeps saying the words

18 "deceitful" and "conning", those -- you said a moment ago that

19 those -- that's the aspect, and that's really one of the major

20 cornerstones of any kind of an ASPD diagnosis. There's no

21 clear evidence of that in this record, is there?

22 A. I don't see clear evidence, and that's one of the

23 problems with a full blown antisocial diagnosis. I will say

24 that as I mentioned earlier, regardless of what -- whether he's

25 antisocial -- and I do believe that he has antisocial traits,

1 you know -- there's no question about it -- he still has

2 schizoaffective disorder. He still has a severe mental

3 disorder. No matter how many personality disorders he has --

4 there's 13 of them. He has features of about seven -- six or

5 seven of them probably, if we sat here and looked at each and

6 every one. The mental disorder is still there. It coexists

7 with low intellect and the personality disorder, altogether.

8 Q. And when Mr. Beach put up his flashcard on the wall

9 that deals with the lack of remorse, lack of the ability to

10 accept responsibility, would it surprise you that the first

11 assault that he's accused of, he actually drove the victim to

12 the hospital and waited there until he was arrested there by

13 the police?

14 A. I -- I heard about that yesterday, and that's not

15 consistent with a lack of remorse.

16 Q. How about -- how about going in and robbing a

17 grocery door and getting caught and giving a full confession?

18 A. Aside from not being a very smart thing to do,

19 that's not what you typically expect an antisocial person to

20 do. An antisocial person usually tries to get away from

21 things, they don't care, they don't feel guilt, they don't feel

22 remorse. Oftentimes they don't feel any depression because

23 they blame all their problems on everybody else, and they're

24 generally pretty happy and charming sometimes.

25 Q. Okay. And let's talk about that. When you talk

1 about happy and charming, you're talking about an individual

2 that exhibits -- that -- that visually exhibits signs that he's

3 just a happy-go-lucky, charming person, gets along with

4 everybody?

5 A. People with antisocial personality disorder, a large

6 percentage of them tend to be really outgoing. They're very

7 social. They trick people. They're very charming. They're

8 sort of like con artists, and -- and so there's definitely a

9 move based on literature to -- to include more of that in the

10 next diagnostic manual, to include more of the behavioral

11 features and the emotional features that go along with a

12 disorder like that.

13 Q. What about the first time, would you expect a fellow

14 the first time they get in trouble with the law and -- and he

15 runs from the police and they find him and they find some

16 narcs, they find some crack cocaine down laying on the ground,

17 and the Defendant says, yeah, that's my drugs. That's -- that

18 seems to be an acceptance of responsibility, doesn't it?

19 A. I -- I would assume so. I am getting a little

20 uncomfortable because I mentioned -- I mentioned earlier that

21 I'm not an expert in antisocial and things like that and so I

22 need to probably limit that.

23 Q. I just want to make sure that when Mr. Beach keeps

24 using -- when he keeps saying deceitful and cunning and failing

25 to accept any responsibility, I just want to make sure it's

1 clear that in this courtroom on this day, that's his theory,
 2 that's not your assent to his theory, is it?
 3 A. That's correct. I -- I didn't use that terminology,
 4 and -- and I haven't seen a lot of evidence for that. My -- my
 5 evidence for the antisocial features comes from his criminal
 6 history that I've learned about over the last few days.
 7 Q. And the criminal history, in closing, doesn't affect
 8 his diagnosis of his mental illness, does it?
 9 A. That is correct.
 10 Q. And that's what we were asked -- that's what you
 11 were asked to do so that you could come in and talk, if you
 12 found one, and explain that to the people that were going to be
 13 making decisions in this case; is that right?
 14 A. That's correct. If I diagnose him with antisocial
 15 personality disorder at this point, it does not change any of
 16 my other diagnoses. He still has a low average to borderline
 17 I.Q. He still has academic dysfunction. He still has
 18 schizoaffective disorder with disturbed mood and thought. All
 19 of that is exactly the same. There's no changes there. I
 20 would just add antisocial features to my personality disorder
 21 diagnosis, which I would like to do. That's essentially what
 22 I'm doing.
 23 MR. JOHNSON: Thank you, Doctor. That's all I
 24 have.
 25 MR. BEACH: That's all I have, Judge.

1 THE COURT: Thank you very much. You are free
 2 to go.
 3 THE WITNESS: Thank you.
 4 THE COURT: Anybody need a bathroom break?
 5 All right.
 6 THE BAILIFF: All rise.
 7 (Jury excused from courtroom.)
 8 THE BAILIFF: All rise.
 9 (Jury returned to courtroom.)
 10 THE COURT: Thank you all. Please be seated.
 11 Please call your next witness.
 12 MR. JOHNSON: Your Honor, the State calls
 13 Nysasno Carter.
 14 THE COURT: Sir, if you would.
 15 (Witness brought forward and sworn.)
 16 THE COURT: Please have a seat.
 17 NYSASNO CARTER,
 18 was called as a witness by the Defendant, and after having been
 19 first duly sworn, testified as follows:
 20 DIRECT EXAMINATION
 21 BY MR. JOHNSON:
 22 Q. Would you state your name, please, and definitely
 23 spell your first name for the court reporter.
 24 A. Nysasno Carter, N-y-s-a-s-n-o.
 25 Q. Okay. Nysasno, how old are you?

1 A. Thirty-five.
 2 Q. Okay. Where do you currently live?
 3 A. Mesquite, Texas.
 4 Q. What kind of work do you do, Nysasno?
 5 A. I own a trucking company.
 6 Q. What kind of trucking do y'all do?
 7 A. We haul dry goods.
 8 Q. Okay. How many people do you have working for you
 9 over there?
 10 A. Two.
 11 Q. Nysasno, are you the brother of the Defendant in
 12 this case, Mr. Gary Green?
 13 A. Yes.
 14 Q. And I think this jury has heard your name quite a
 15 few times during the course of this trial. I want to ask you a
 16 little bit about -- about yourself growing up. Could you tell
 17 the jury where you and Gary were raised?
 18 A. Excuse me?
 19 Q. Could you tell the jury where you and Gary were
 20 raised?
 21 A. Dallas, Texas, Pleasant Grove.
 22 Q. Okay. And your mamma is Mary Sampson who testified
 23 earlier?
 24 A. Yes.
 25 Q. Your grandma, Bertha Curry, testified earlier?

1 A. Yes.
 2 Q. You have an Aunt Shirley Coleman?
 3 A. Yes.
 4 Q. You have a whole bunch of people in your family?
 5 A. Correct.
 6 Q. I mean, there's people splintered out everywhere?
 7 A. Correct.
 8 Q. Did you ever know your father?
 9 A. Not until I got older.
 10 Q. How old were you -- your father -- your father and
 11 Gary's father is the same individual?
 12 A. Correct.
 13 Q. What's his name?
 14 A. Thomas Carter.
 15 Q. And how was it that you came to know him later in
 16 life?
 17 A. I think I was like nine or ten.
 18 Q. Do you recall -- and your stepfather is who?
 19 A. Leon Sampson.
 20 Q. Could you tell the jury how it was that you and your
 21 stepfather got along -- or get along, still?
 22 A. Get along good.
 23 Q. Okay.
 24 A. We --
 25 Q. Leon a good man?

1 A. Yes, he is. He's a good father.
 2 Q. And could you tell the jury how Gary and Leon ever
 3 got along?
 4 A. They didn't get along as well as me and Leon did.
 5 Q. Okay. Could you -- what was it about him that
 6 causes you to say that? What -- what was different?
 7 A. Gary couldn't really -- my dad had a -- owned a
 8 remodeling company, and Gary couldn't really cope with learning
 9 how to use the tools and what -- things like that.
 10 Q. How did they get along as far as on a personal
 11 relationship?
 12 A. They had their good and bad days.
 13 Q. Okay. And did Gary have problems accepting Leon as
 14 his father?
 15 A. Yes.
 16 Q. You pretty much -- you considered Leon Sampson to be
 17 your father; is that right?
 18 A. Yes.
 19 Q. Did Gary and Leon ever bond in that same way that
 20 you and your father bonded?
 21 A. No, sir.
 22 Q. You talked, again, about working in the
 23 construction, and a lot of things -- you and I have met on many
 24 occasions and we've talked and we talked to different family
 25 members. And in that family history of yours, is there all

130

1 different kinds of people in your family?
 2 A. Yes, it is.
 3 Q. When you were growing up, did you have a lot of
 4 interaction with those different people?
 5 A. Yes, I did.
 6 Q. And when you said that -- when you and Gary -- part
 7 of the things that y'all did growing up was working with your
 8 dad. You've described for me before, you've described for my
 9 psychologist, you've talked to Dr. Goodness, you've talked to
 10 Dr. Martinez, and they've talked to you about all these things
 11 that went on back in Gary's background; is that right?
 12 A. Yes.
 13 Q. And you described some of these areas that even in a
 14 very early age, problems that Gary had doing things; is that
 15 right?
 16 A. Correct.
 17 Q. Give them -- can you give us some examples of those
 18 things that you recall?
 19 A. Several incidents as far as in -- on a -- used to
 20 work on Saturdays, and Gary didn't know how to use a hammer.
 21 And he would -- used to get mad, and he didn't want to go
 22 anymore. And then as far as in working on cars, he didn't want
 23 to -- he didn't want to -- he put oil in the gas tank and
 24 messed it up.
 25 Q. Okay. I mean, did Gary just have problems when he

1 was growing up, trying to same things that seemed kind of
 2 natural to you?
 3 A. Yes.
 4 Q. Nysasno, let me ask you a question. As you sit here
 5 on the witness stand today, do you believe your brother is
 6 mentally ill?
 7 A. Yes, I do.
 8 Q. Could you tell the jury how long and how far back
 9 you started believing that?
 10 A. Ever since I was little -- years.
 11 Q. Okay. And you -- and you haven't been able to sit
 12 in the courtroom because you were going to be a witness in this
 13 part. Tell the jury what it is about Gary that even when you
 14 were little, that you thought was different about him or what
 15 you thought was strange about Gary Green.
 16 A. He used to always talk about death, that he don't
 17 have nothing to live for. Used to say that he hear things. He
 18 don't believe in God. He don't understand why God got him this
 19 way, those type of things.
 20 Q. Why God got him what way?
 21 A. The way that he is, that he don't understand.
 22 Q. How did -- how did Gary get along with his
 23 schoolmates?
 24 A. He was off to his self.
 25 Q. Did -- did Gary really ever have a lot of close

132

1 friends or a lot of friends at all?
 2 A. No.
 3 Q. Did you think that was strange?
 4 A. Yes.
 5 Q. Did you -- did you have friends?
 6 A. Yes, I did.
 7 Q. Did you have a lot of friends?
 8 A. Yes, I did.
 9 Q. Did you try -- I mean, how did you and Gary get
 10 along?
 11 A. We got along good to -- you know, as brothers.
 12 Q. Did you try to do things to help him?
 13 A. Yes, I did. By me being the baby brother, I did.
 14 Q. Did it seem kind of weird that the baby brother is
 15 trying to help the bigger brother?
 16 A. Yes, it did.
 17 Q. Okay. And is that really truthfully been the way
 18 it's kind of been your whole life?
 19 A. Yes.
 20 Q. Nysasno, when you said that Gary was always by
 21 himself, what -- what about that seemed strange to you?
 22 A. It all seemed strange to me. As far as in -- a
 23 young man, you know, want to be by his self, didn't want to
 24 play, isolated his self from everybody.
 25 Q. How did Gary do in school?

133

1 A. Such as --

2 Q. Do you know what kind of grades Gary made in school?

3 A. He didn't make good grades.

4 Q. Did you know -- did you know if your mamma was ever

5 aware or did your mamma ever say anything to you about Gary

6 having a problem?

7 A. No.

8 Q. Did you ever say anything to your mamma about your

9 concerns in regards to Gary?

10 A. Yes.

11 Q. How did she react to that?

12 A. She kind of brushed me off.

13 Q. Didn't want to hear it?

14 A. Yes.

15 Q. Nysasno, when you look around and you look

16 throughout your extended family tree, is there quite a few

17 folks in your family that have mental problems?

18 A. Yes.

19 Q. Is there quite -- is there very many of them willing

20 to admit it?

21 A. No.

22 Q. Very many of them getting help for it?

23 A. Correct.

24 Q. No, I say are very many of them getting help?

25 A. No, sir.

134

1 Q. You said earlier that -- that you and Gary were

2 close. Were you close with Gary up to the point wherever he

3 quit high school?

4 A. Yes.

5 Q. How old -- what grade was Gary in when he quit high

6 school?

7 A. I believe it was the 11th grade.

8 Q. Do you know why he quit?

9 A. No, sir.

10 Q. How -- did you know -- do you recall back then as to

11 how Mary and Leon responded in reaction to that?

12 A. No, sir.

13 Q. But all of a sudden just one day Gary quit and you

14 don't -- didn't seem to be that big of a deal in the family?

15 A. Correct.

16 Q. What about as far as -- did you know Jennifer

17 Alcorn?

18 A. Know a little, yes.

19 Q. Okay. And you are familiar that Gary got in trouble

20 for assaulting her, went to the penitentiary?

21 A. Correct.

22 Q. How was Gary -- when Gary went to the penitentiary,

23 he was just there for -- for several months for that; is that

24 right?

25 A. Correct.

135

1 Q. He got out for a couple of months and went back for

2 a robbery?

3 A. Correct.

4 Q. Did you have occasion to visit him when he was in

5 the penitentiary?

6 A. Which time, the first time?

7 Q. Or either of the two times.

8 A. Yes, I did.

9 Q. You see him both the first time he went and the

10 second time?

11 A. Not the first time.

12 Q. You didn't see him the first time?

13 A. No.

14 Q. Okay. How about the second time, did you have a

15 chance to talk to him?

16 A. Yes.

17 Q. And how often would you see him while he was in the

18 penitentiary?

19 A. Two or three times a month.

20 Q. You saw him that often?

21 A. Yes.

22 Q. As -- as the Defendant got out of the penitentiary,

23 about how old was he when he got out of that penitentiary the

24 second time?

25 A. I don't recall.

136

1 Q. Okay. Did there come a time whenever you and him

2 got a job together after that?

3 A. Yes.

4 Q. Where was y'all working at?

5 A. Walmart.

6 Q. Okay. How was Gary acting around that point in time

7 in his life?

8 A. Acting the same, strange.

9 Q. Okay. Has Gary ever -- in your way of thinking, has

10 Gary just acted -- been a normal person?

11 A. No.

12 Q. I mean, any doubt about that whatsoever?

13 A. I have my doubts.

14 Q. No, I'm saying is there any doubt -- when you say

15 you have doubts, do you have any doubts as to whether or not

16 there's something wrong with Gary?

17 A. Yes, I do.

18 Q. All right. I think -- I think we may be talking --

19 using the same word in different ways.

20 THE COURT: Paul, slow down.

21 MR. JOHNSON: Okay.

22 Q. Nysasno, the things that you've seen wrong with

23 Gary, have you ever had occasion to talk to him about those

24 things?

25 A. Yes.

137

1 Q. Tell the -- tell the jury how those conversations
2 came about.
3 A. When I was on the road driving to 48 states, I used
4 to talk to him, and we would start off talking about something,
5 you know, which state I'm in or something, and he'll say,
6 well --
7 MR. BEACH: Judge, unless there's some kind of
8 exception, I'm going to have to object to hearsay of what he
9 said.
10 MR. JOHNSON: I'll -- I'll make -- state it.
11 Q. (BY MR. JOHNSON) And let me -- let me ask you as
12 far as time frame, when were you driving on the road?
13 A. Three years ago.
14 Q. Okay. And -- on the course of your -- the times
15 that you were driving, starting back three years ago, did it
16 come to have conversations with Gary in which he would describe
17 for you certain things in regards to his mental state, his
18 emotional state at the time that he was describing it to you?
19 A. Yes.
20 Q. Could you tell the jury what it was that he was
21 talking about in that regard?
22 A. He was saying he was hearing things. He -- he don't
23 need to -- he doesn't have nothing else to live for. All I
24 used to tell him, he just need to pray.
25 Q. Why did you tell him he just needed to pray?

138

1 A. That's the typical thing that you need to do when
2 you're going through something.
3 Q. Okay. What about going to see a psychiatrist?
4 A. Yes, we talked about that.
5 Q. Okay. Did you ever have any thoughts -- did you
6 talk to Gary about going to a see a psychiatrist?
7 A. Yes, I did.
8 Q. This incident that Gary is being convicted of that
9 occurred a year ago, how -- how soon or how far prior to this
10 incident do you recall having conversations with Gary about
11 needing to go -- he needed to go to the hospital?
12 A. About six months prior to this -- prior to the case.
13 Q. Okay. And -- and what was it that precipitated or
14 what was it that caused you to start really thinking that he
15 had a real need to go into the hospital?
16 A. Because he was constantly talking about he was
17 tired. It would just sound like he was really ready to just
18 give up.
19 Q. Okay. And when he was saying about these voices
20 that he was hearing, what was he describing, or did he ever
21 describe anything in particular about those voices?
22 A. Just described that he hearing demons.
23 Q. Okay. Did he say anything about what the demons
24 were telling him to do?
25 A. No, sir.

139

1 Q. And how -- when you were driving the truck
2 throughout the different states, how often were you gone?
3 A. Weeks at a time.
4 Q. How often would you talk to Gary?
5 A. Two or three times a week.
6 Q. And were you -- how serious were you concerned about
7 what he was describing to you?
8 A. I was very serious.
9 Q. Did you ever think about trying to get him committed
10 yourself?
11 A. Yes, I did.
12 Q. Did you talk to Gary about that?
13 A. We talked about it on one occasion, and I told him
14 when I get back in, that we was going to try to go to the
15 doctor.
16 Q. Okay. But that never came about, did it?
17 A. No, sir.
18 Q. Why not?
19 A. When I came back in, I couldn't get in contact with
20 him.
21 Q. Whenever these -- whenever this was going on and you
22 were out on the road quite a bit, how often would you
23 actually -- not talking to him on the phone, but how often
24 would you actually see Gary?
25 A. When I was home, probably twice -- two times if I

140

1 was at home, depending on how long I was home.
2 Q. Okay. Did he talk to you about what he calls --
3 what he has always called being stressed?
4 A. Yes.
5 Q. What -- how did he -- how did he use that term or
6 what did -- what did that mean to you when he talked to you
7 about being stressed?
8 A. It meant to me, you know, something was wrong, that
9 he was having a major breakdown.
10 Q. Did that -- is that the way that he always seemed to
11 be?
12 A. Yes.
13 Q. Leading up to the time before this incident
14 occurred, do you recall the circumstances for how you became
15 aware of the fact that Gary was in Timberlawn Hospital?
16 A. Yes.
17 Q. Tell the jury how that came about.
18 A. I had called his cell phone one day, and Lovetta
19 answered his phone, said that he was at work. And I thought it
20 was kind of strange that she answered his phone because I know
21 he don't normally leave his phone. And she said when he called
22 back, she would have him to call me. Like 30 minutes later he
23 called me back. The caller I.D. said Timberlawn, and I asked
24 where he was. And he said where he was, said he needed to get
25 some help.

141

1 Q. Okay. What did you think about that?

2 A. I think that was the best idea.

3 Q. Okay. Did he tell you he was over there so he could

4 get some -- get some crazy checks?

5 A. No, sir.

6 Q. Did -- do you think this was some kind of ruse Gary

7 was going through to try to get some kind of crazy checks?

8 A. I think he was trying to get some help.

9 Q. Is that what he told you?

10 A. Yes.

11 Q. And you and him had talked about that and discussed

12 it before?

13 A. Correct.

14 Q. Was there any doubt in your mind that Gary needed

15 help?

16 A. A lot of time.

17 Q. How long was Gary actually in Timberlawn, do you

18 know?

19 A. I believe three or four days.

20 Q. Okay. And after -- how often did you talk to him

21 while he was in Timberlawn?

22 A. Just that one time.

23 Q. You just talked to him that once. Did you ever see

24 Gary again after he got out?

25 A. No, I didn't.

142

1 Q. Did you ever talk to him again?

2 A. I talked to him on that Monday.

3 Q. On which Monday?

4 A. The Monday to the -- prior to the case.

5 Q. Okay. And what was the circumstance, or how did

6 that conversation come about?

7 A. He said that --

8 MR. BEACH: Judge, I'm going to object to what

9 he said.

10 Q. (BY MR. JOHNSON) Okay.

11 THE COURT: Sustained.

12 Q. (BY MR. JOHNSON) Did -- when he was talking to you

13 on that particular occasion, was he -- was there anything about

14 his emotional state or his mental state that y'all discussed?

15 A. Yeah, he sounded slow, sounded, you know, like he

16 was really tired, said that he was cleaning up.

17 Q. Now, are you talking about the day of the incident

18 that happened?

19 A. Yes.

20 Q. Okay. Let me ask you this question, then. After he

21 got out of Timberlawn, do you recall if you spoke to him again

22 until the time that this incident occurred?

23 A. No.

24 Q. Okay. But you talked to him on that particular day?

25 A. Correct.

143

1 Q. All right. And you said you spoke to him and

2 without going into what he told you at that point in time, you

3 talked to him in the afternoon?

4 A. Yes.

5 Q. Okay. And you didn't talk to him again until that

6 night, did you?

7 A. Correct.

8 Q. Could you tell the jury how it was that night -- how

9 that night came about -- I mean, you got started with a phone

10 call from your mom?

11 A. Correct.

12 Q. I think the jury has heard several times about how

13 y'all got together and went to find him, so I'll skip over

14 those particular details. But I want to ask you this. Can you

15 tell this jury how Gary appeared to you whenever you first came

16 in contact with him that night?

17 A. Really spaced out.

18 Q. Did he -- did he seem even different than he

19 normally did when he was always depressed, or did he seem

20 different?

21 A. Seemed very different.

22 Q. In what way, Nysasno? If you can describe it for

23 this jury, can you tell them?

24 A. He -- he felt like -- it felt like someone who have

25 been -- done went through something real bad. And that -- that

144

1 he made a mistake on.

2 Q. And you ended up taking him to the police station?

3 A. Correct.

4 Q. And he told you about him taking all -- did he tell

5 you about him taking all the pills that he took?

6 A. No, sir.

7 Q. How -- when did you find out about that?

8 A. When we got into the police station.

9 Q. Okay. But you -- how long -- how long were you with

10 Gary that night?

11 A. Roughly, 30, 45 minutes.

12 Q. Okay. And after the police took him off, what was

13 the next really -- did you have any other involvement with this

14 case after that?

15 A. No, sir.

16 Q. Have you had occasions, Nysasno, to see Gary in the

17 penitentiary -- or while he's been locked -- not in the

18 penitentiary, but here in the county jail --

19 A. Yes, I have.

20 Q. -- Since this happened. Have you had occasions to

21 talk with him about what had happened?

22 A. Yes.

23 Q. Has he -- has he talked to you about his feelings in

24 regards to what had happened?

25 A. Yes, he has.

145

1 Q. Can you tell the jury what he's told you?

2 MR. BEACH: Judge, I'm going to object to what

3 his feelings are.

4 MR. JOHNSON: I'm sorry?

5 MR. BEACH: His feelings.

6 THE COURT: Well, okay, I know, I know.

7 MR. JOHNSON: I'll rephrase the question, Judge,

8 maybe --

9 THE COURT: All right.

10 Q. (BY MR. JOHNSON) Nysasno, have you had occasions to

11 talk to Gary and -- and when you've seen Gary, has he been

12 normal, or has he been still in that depressed state that

13 you've talked about him always being in?

14 A. Still in that depressed state.

15 Q. Has he told you that he's been hearing -- that he's

16 still hearing voices?

17 A. Yes, he have.

18 Q. Can you tell the jury what voice it is that he's

19 telling you he's hearing?

20 A. Lovetta -- Lovetta voice.

21 Q. And what's Lovetta telling him?

22 A. That she forgive him.

23 Q. How -- what's the context of how he's told you he's

24 heard -- that he's talked to her?

25 A. As he was sitting on the end of his bunk -- on the

146

1 end of his bed, she came to him like she was on the side of

2 him.

3 Q. Do you know there's a lot of folks in this room

4 that -- that may not have forgiven Gary for what he's done, and

5 you understand this jury has got a -- some very serious

6 decisions to make about Gary? Do you understand that?

7 A. Yes.

8 Q. Nysasno, I want to ask you a question. Is Gary

9 Green -- any doubt the brother that you love, is there any

10 doubt whatsoever that he's -- that he's got a very severe

11 mental problem?

12 A. Yes, he does.

13 MR. JOHNSON: That's all the questions I have

14 for you right now, Nysasno.

15 THE COURT: Cross.

16 CROSS-EXAMINATION

17 BY MR. BEACH:

18 Q. Nysasno, I've got to ask you this. What were the

19 names of those two dogs?

20 A. Excuse me?

21 Q. The name of those two dogs.

22 A. What two dogs are you referring on?

23 Q. That Gary and Mark burned up?

24 A. Gary and who?

25 Q. Mark -- Marcus?

147

1 A. I don't know.

2 Q. You don't remember telling that lady out there that

3 when Gary and you were living together, you had two dogs and he

4 and his friend set them on fire?

5 A. What lady are you speaking to?

6 Q. The one in the front row there with the dark hair,

7 Kelly? You know Kelly, don't you?

8 A. Yes, I do.

9 Q. I mean, it's in her report that you told her that.

10 Were you telling her a lie when you told her that, or did it

11 not happen or what?

12 A. You said a name that I didn't know.

13 Q. Okay.

14 A. Yeah.

15 Q. Who -- who is the guy?

16 A. Demarcus.

17 Q. Demarcus?

18 A. Yes.

19 Q. I'm sorry. So going back to my original question,

20 what were the names of the two dogs?

21 A. Cain and White.

22 Q. Cain and White?

23 A. Yes.

24 Q. Now, we met when you came down to testify with your

25 mom to the grand jury about a year ago; is that right?

148

1 A. Correct.

2 Q. And I'm going to get through this real quick,

3 Nysasno. You came from the same biological parents as Gary

4 Green; is that correct?

5 A. Correct.

6 Q. And how old were you -- excuse me, was your

7 biological dad Thomas Carter; is that right?

8 A. Yes.

9 Q. Was he still around when you were born?

10 A. What do you mean?

11 Q. I mean, was he still in the house -- when your mom

12 brought you home from the hospital, it's your understanding,

13 was your biological father still in a relationship with your

14 mom?

15 A. No.

16 Q. So you never had any relationship with Thomas

17 Carter?

18 A. When I got older.

19 Q. Okay. But in the -- in your infancy, toddler years,

20 he was not around?

21 A. No.

22 Q. Okay. And Gary is three and a half years older than

23 you?

24 A. Yes.

25 Q. So is it fair to say that Gary would have been

149

1 three, three and a half by the time that your -- your
2 biological father was out of the picture?
3 A. Yes.
4 Q. Okay. So he would have only been exposed to Thomas
5 Carter on a full-time basis for about three years?
6 A. Yes.
7 Q. You've told us that Leon Sampson is a good man, hard
8 working man, he's your father; is that correct?
9 A. Correct.
10 Q. And you looked up to him and he instilled in you a
11 work ethic and good values, knowing the difference between
12 right and wrong; is that right?
13 A. Correct.
14 Q. And Leon Sampson tried to do the same thing with
15 Gary; is that right?
16 A. Correct.
17 Q. You told us that growing up Gary didn't have any
18 friends. Was Demarcus a friend of his?
19 A. No.
20 Q. Just an acquaintance?
21 A. Yes.
22 Q. Okay. Remember a guy named Levi?
23 A. Yes.
24 Q. Was that a friend of Gary's?
25 A. He was a friend of everybody's.

150

1 Q. Okay. Gary hang out with Levi?
2 A. On occasion.
3 Q. And then after Gary got out of the penitentiary for
4 the robbery, do you recall him having any friends?
5 A. I don't recall.
6 Q. Other than girlfriends?
7 A. I don't recall.
8 Q. He had a lot of girlfriends, didn't he?
9 A. Sir?
10 Q. He had a lot of girlfriends, didn't he?
11 A. He had a lot of friends.
12 Q. I can't remember -- were you in here yesterday when
13 any of this testimony was going on?
14 A. No, I've been sitting in the hall.
15 Q. So you didn't hear Shirley Coleman testify; is that
16 right?
17 A. No.
18 Q. When Gary got out of the penitentiary, he married
19 that older lady Belinda Lacy; is that right?
20 A. Yes.
21 Q. And were you there when they got married?
22 A. No.
23 Q. Okay. And that marriage lasted about three weeks?
24 A. Somewhere up in there, yes.
25 Q. And you and Gary were working together at that time?

151

1 A. Yes.
2 Q. Okay. And Gary was spending a lot of time with you;
3 is that right?
4 A. Yes.
5 Q. Both at work and away from work?
6 A. Mostly at work.
7 Q. Okay. So we know Gary during that about year and a
8 half time frame was fathering four different children; is that
9 correct?
10 A. Correct.
11 Q. Okay. And that's always been a bone of contention
12 between you and Gary; is that right?
13 A. Been a what?
14 Q. Bone of contention that he's not taking care of his
15 kids, and you've been telling him he needs to do that; is that
16 right?
17 A. Yes.
18 Q. You've been more of a father to Gary's biological
19 kids than Gary ever was; is that --
20 A. No, I've been an uncle to them.
21 Q. I'm sorry?
22 A. I've been an uncle to them.
23 Q. Uncle to them. But I mean, going to their games --
24 athletic games, giving them money, buying them things, you were
25 doing that; is that correct?

152

1 A. Yes, because my kids were on the same team.
2 Q. Okay. Was Gary at their games?
3 A. No.
4 Q. Was Gary giving them money?
5 A. No.
6 Q. You told us that a bunch of your family members have
7 had psychological or psychiatric issues; is that right?
8 A. Yes.
9 Q. And y'all don't talk about it?
10 A. No.
11 Q. Some of them have actually been hospitalized; is
12 that correct?
13 A. I don't recall.
14 Q. You don't know?
15 A. No.
16 Q. Okay. And whatever the stigma is -- I mean, Gary
17 was able to get over at it at least that time he went to
18 Timberlawn; is that right?
19 A. Yes.
20 Q. He checked himself in?
21 A. Yes.
22 Q. You didn't force him to do that; is that right?
23 A. No.
24 Q. You told me at the grand jury that your
25 understanding as to why Gary was there, because he was feeling

1 a lot of pressure; is that correct?

2 A. Correct.

3 Q. You were aware that Gary had that job from March to

4 August with the -- with Power Guardian; is that correct?

5 A. Yes.

6 Q. Did you ever meet any -- his employer or any of his

7 co-employees?

8 A. No.

9 Q. Didn't ever meet Vonn Miller?

10 A. No.

11 Q. What was your understanding as to what Gary was

12 doing on a day-to-day basis for Power Guardian?

13 A. Installing batteries.

14 Q. Installing batteries?

15 A. Yes.

16 Q. We're not talking about flashlight batteries, we're

17 talking big corporation batteries; is that correct?

18 A. Correct.

19 Q. I mean, it was -- it was a technical job, wasn't it?

20 A. Probably so, yes.

21 Q. Gary was going out of town and being with people,

22 his co-employees and spending nights out of town; is that

23 correct?

24 A. Correct.

25 Q. And Gary quit that job, didn't he?

154

1 A. I don't recall what happened.

2 Q. You told us that Gary calls you from Timberlawn and

3 then he gets out. The records show August 24th, whatever they

4 show. You didn't see him between August 24th and the date of

5 the murders; is that correct?

6 A. Correct.

7 Q. Talked to him one time on the phone?

8 A. Correct.

9 Q. Now, you do recall when you came down and testified

10 in front of the grand jury that I asked you about what Gary

11 told you about what happened that night. Do you recall that?

12 A. Yes.

13 Q. Okay. You've see your grand jury testimony in the

14 last couple of weeks; is that right?

15 A. Correct.

16 Q. Gary told you that he did, in fact, murder Lovetta;

17 is that correct?

18 A. Yes.

19 Q. But he would never admit to you that he killed the

20 little girl; is that right?

21 A. Correct.

22 Q. You asked him what happened to the baby; is that

23 right?

24 A. Correct.

25 Q. And he just wouldn't talk about it, or said he

1 didn't do it?

2 A. He didn't say.

3 Q. The night you and your mom and your wife and your

4 aunt end up meeting up with Gary over there on Jennie -- Jennie

5 Lee; is that correct?

6 A. Yes.

7 Q. He was at a friend's house that night; is that

8 correct?

9 A. Correct.

10 Q. That's Mark?

11 A. Yes.

12 Q. And Gary had enough of a relationship with Mark that

13 he had -- he had spent the days and nights leading up to this

14 over there; is that right?

15 A. I don't know. My first time seeing him.

16 Q. Your first time seeing Mark?

17 A. Yes.

18 Q. You knew he was over at his friend's house in

19 those -- in the week leading up to the murder; is that correct?

20 A. No, I didn't.

21 Q. Had he ever called you from over there?

22 A. No, he didn't.

23 Q. How did you know that Mark was a friend of his? He

24 talked about him?

25 A. No, he didn't.

156

1 MR. BEACH: That's all I have, Judge.

2 REDIRECT EXAMINATION

3 BY MR. JOHNSON:

4 Q. Nysasno, in regards to that -- the way you found out

5 where he was at that night was calling back a number off of

6 caller I.D.; is that right?

7 A. That my mom got off of caller I.D., yes.

8 Q. The person that -- the person whose house y'all went

9 to, that's not someone you had ever seen, heard of, or knew at

10 all before this night; is that right?

11 A. Correct.

12 Q. And you didn't know if that was just someone Gary

13 was staying with because Lovetta had put him out of the house

14 the week before?

15 A. Right.

16 Q. Mr. Beach asked you a question over there a minute

17 ago about the way Gary took care of his life, took care of his

18 personal business, took care of his children. He asked you if

19 that was a bone of contention amongst you and him; is that

20 right?

21 A. Yes.

22 Q. Gary didn't -- Gary really didn't do nothing in his

23 life the normal way, did he?

24 A. No.

25 Q. And you always knew, didn't you, or did you not

157
1 always know that that's because there was something wrong with
2 him?
3 A. Yes.
4 Q. He -- he asked you if Gary got over the stigma
5 about -- about being mentally ill or being crazy, whatever word
6 you want to use, long enough to go to Timberlawn Hospital. In
7 fact, when he went and checked himself in, Lovetta was lying to
8 you about where he was at, wasn't she?
9 A. Correct.
10 Q. And you wouldn't have known that he was in
11 Timberlawn if he hadn't -- if it hadn't come up on your caller
12 I.D.?
13 A. Correct.
14 Q. When you -- you said something to him about, I know
15 where you are, that's when he admitted to you what was going
16 on, didn't he?
17 A. Yes.
18 Q. So it wasn't like he was calling you up, saying,
19 well, hey, I'm -- I found a way to get me a crazy check,
20 Nysasno?
21 A. Right.
22 Q. He -- he was actually trying to keep it from you
23 that he was in Timberlawn at first, was he not?
24 A. Correct.
25 MR. JOHNSON: I don't have anything further for

158
1 you, Nysasno. Thank you very much.
2 RECROSS-EXAMINATION
3 BY MR. BEACH:
4 Q. Nysasno, I can't call Lovetta to say whether or not
5 she was lying or not, can I?
6 A. No.
7 MR. BEACH: That's all I have.
8 MR. JOHNSON: Nothing further, Judge.
9 THE COURT: Thank you, sir. You may step down.
10 MR. JOHNSON: Your Honor, I have a brief matter
11 that needs to be on the record outside the presence.
12 THE COURT: All right. Ladies and gentlemen, we
13 need you to please step out.
14 THE BAILIFF: All rise.
15 (Jury excused from courtroom.)
16 THE COURT: All right. Jury is not now present.
17 Y'all can sit down.
18 MR. JOHNSON: Your Honor, at this time I need to
19 put something on the record from my Defendant who has
20 previously been sworn. But before we do, Judge, could I have
21 just one moment to consult with him?
22 THE COURT: Yeah.
23 MR. JOHNSON: Come on, Gary.
24 (Recess.)
25 (Defendant and counsel return to courtroom.)

159
1 MR. JOHNSON: Your Honor, you want me to go
2 ahead and make a record?
3 THE COURT: Go ahead, please.
4 GARY GREEN,
5 the defendant, was called as a witness in his own behalf, and
6 after having been previously duly sworn, testified as follows:
7 DIRECT EXAMINATION
8 BY MR. JOHNSON:
9 Q. Your name is Gary Green?
10 A. Correct.
11 Q. Gary, we've just called your brother and he was the
12 last witness that we had intended to call on the issue of
13 punishment. And you understand that at this time, again, that
14 you have an opportunity and the right to make -- to take the
15 witness stand and testify if you choose to do so. I want to
16 make sure that you fully understand that right. And it's
17 just -- basically I'm going to ask you the same things that I
18 asked you before. This jury is about to go back and decide two
19 special issues which will determine the sentence in this case.
20 And you were present for about two months of voir dire, and you
21 understand what the questions are and what the -- what those
22 decisions and those question answers will decide? You
23 understand all that, right?
24 A. Correct.
25 Q. Gary, if you wish to testify on the issues of

160
1 punishment, if you have anything to say to the jury, you
2 understand you have the absolute right to do so. You have an
3 absolute right not to do so, if that's how you decide to
4 proceed. If you decide that you want to testify, no matter how
5 I've advised you, if it's my advice that you shouldn't, but you
6 wish to do so, that I would put you up there and I would
7 question you in such a way as to bring forth anything that you
8 wish to say to the jury, bring that out in the light that would
9 be most favorable to you. Do you understand that?
10 A. Correct.
11 Q. The bottom line is, this is a right that you have
12 and only you have. And for all intents and purposes, unless
13 there's something that may happen that we have no control over
14 and no power or ability to control, the decision that this jury
15 is about to make is going to be the final decision in this
16 case. So when you exercise your right to make a decision this
17 afternoon, it's not going to be a decision that you can come
18 back later and say, well, you know, I should -- I should have
19 done something different because the decision you make today is
20 going to be pretty much binding upon you. And that's why I
21 want to make sure that you recognize that you have that right
22 and you have the ability to exercise it. Is that fair enough?
23 A. I understand.
24 Q. After knowing all those things, Gary, and after
25 you've had an opportunity and we've gone back into the holdover

161
1 cell and you've spoken to Kobby and Brady and myself about this
2 and we talked about the status of the case, you've indicated to
3 us in talking to you going through the trial preparation and
4 talking to us about the people that we might have potentially
5 called, you've indicated to us that we have called the people
6 that you wanted to speak on your behalf; is that right?
7 A. Correct.
8 Q. And we've called the doctors that we wanted to have
9 come in here and talk and try to offer the jury information
10 they can use in answering these questions; is that right?
11 A. Correct.
12 Q. There's not anybody at all that you've asked us to
13 call or to talk to on your behalf that we've refused to do so,
14 is there?
15 A. No.
16 Q. In fact, we've been pretty exhaustive in talking to
17 you about anybody that might have any information that would be
18 relevant to these issues. And, in fact, we've talked to a
19 whole lot of folks and interviewed a whole lot of folks that
20 we've interviewed and talked to you about, and we've just all
21 decided that they wouldn't have anything to say. And you're in
22 agreement with those decisions; is that correct?
23 A. Correct.
24 Q. Gary, knowing that this will be the end of the case,
25 this will be the end of the evidence on your behalf, are you

162
1 satisfied with our efforts?
2 A. Extremely satisfied.
3 Q. And do you have any complaints at all that you want
4 to make about either my representation or the representation of
5 Mr. Wyatt and Mr. Warren?
6 A. I think you three gentlemen went way beyond the
7 scope of your -- your job or your duties, so I'm overly
8 satisfied.
9 Q. Okay. What is your decision in regards to taking
10 the witness stand in this portion? Do you wish to exercise
11 your Fifth Amendment rights?
12 A. Yes.
13 Q. Okay. And so we're going to request that the Court
14 instruct the jury to disregard or not to consider that for any
15 purpose and that's the way you wish to proceed?
16 A. Correct.
17 MR. JOHNSON: Judge, that's all I have.
18 THE COURT: All right. So it's your intention
19 to rest?
20 MR. JOHNSON: Yes, sir.
21 THE COURT: What's the State going to do after
22 that?
23 MR. BEACH: Offer that one portion, Judge, the
24 highlighted letter.
25 THE COURT: What says the Defense?

163
1 MR. JOHNSON: How are we going to do it, Judge?
2 MR. BEACH: I'd like to just read it which will
3 be the easiest, from there to there and here, here.
4 (Document handed to counsel.)
5 (Discussion off the record.)
6 THE COURT: All right. What does the State want
7 to offer in rebuttal?
8 MR. BEACH: Excerpts of a couple of letters that
9 the Defendant wrote to his girlfriend, specifically: But I
10 know that's all behind us now. Jennifer, when we first became
11 as one, I said if you ever blank, blank, blank over me, think
12 you can play with my feeling, I'll kill you. Isn't that what I
13 said, question mark, question mark, question mark. I see you
14 and nobody else can just --
15 COURT REPORTER: I'm sorry, I cannot hear you.
16 MR. BEACH: You see and nobody else can just
17 turn on my feelings and turn them off when you get ready. I'm
18 not make out that can of material.
19 That's one excerpt.
20 The second is: I have associated with people on
21 both sides of the laws. I just choose to go the wrong way.
22 With me doing the wrong thing, that placed me here. It wasn't
23 the money mostly. It was the high of done wrong and getting
24 away. I wasn't on drugs or alcohol. Like to think I was
25 completely sane at that time. You see, I know what it takes to

164
1 make and be a success, but this place at this time is the best
2 place for me. Understand what I'm talking about first before
3 you make a judge of my sanity. When I was out, my people will
4 tell you that if I wasn't incarcerated at that time of the
5 summer of 1990, I would have killed up a lot of people or been
6 killed. Really because I was gone, I really was living day to
7 today, not caring about life and people.
8 Those two excerpts, Your Honor.
9 THE COURT: What says the Defense?
10 MR. JOHNSON: Judge, we -- we are going to
11 object to these -- these portions of these letters. We are --
12 our first objection is going to go to the fact that we had not
13 been tendered any of this material until just three days ago,
14 and we feel we've been surprised by the production of these
15 documents. At this time the State's intending to use them, and
16 we feel we are being unfairly prejudiced by the admission of
17 these letters -- these threats at this time, and due to the
18 fact that we weren't being allowed to use them in any way in
19 any of our consultation with expert witnesses and the analysis
20 by our experts in regards to any of these statements. And we
21 feel like the Court -- or the State should have exercised due
22 diligence in seeking out to determine whether or not there was
23 anything such as these letters in existence which may have been
24 useful or -- or -- in their case.
25 So bringing them up here on -- while we're in

165

1 the punishment phase of a -- of a capital crime, Judge, I think

2 is -- and certainly a case that the Court has discretion to

3 decide whether or not the admission of them at this time would

4 be violative of the Defendant's due process rights and

5 violation of the State, as well as the 8th and 14th Amendments

6 to the United States Constitution. And we're going to object

7 to them on that basis.

8 THE COURT: I -- I --

9 MR. JOHNSON: I have another objection, also.

10 THE COURT: Well, let's just -- one objection at

11 a time. I'm looking at Article 37.07(g). Where is your

12 appellate lawyer?

13 MR. HEALY: She went to get cases on argument.

14 THE COURT: Okay. That's nonsensical.

15 MR. HEALY: I'm just telling you where they

16 went.

17 (Counsel returns to courtroom.)

18 THE COURT: Okay. 37.07(g), untimely request of

19 the Defendant --

20 MS. LAMBERT: 37.07 or 37.071?

21 THE COURT: 37.07(g).

22 MS. LAMBERT: Which section?

23 THE COURT: G.

24 MS. LAMBERT: It's numbered. 37.07?

25 THE COURT: Section 3(g).

166

1 MS. LAMBERT: Okay. That's due to extraneous

2 offenses.

3 THE COURT: Yes.

4 MS. LAMBERT: Did I miss something?

5 THE COURT: And bad acts.

6 MS. LAMBERT: Okay.

7 MR. BEACH: He objects that we were going to --

8 did not exercise due diligence in giving them to them, so we

9 never gave them notice until --

10 MS. BENNETT: We're in rebuttal.

11 MR. BEACH: -- when he first found out about it.

12 MS. LAMBERT: We already talked about this.

13 THE COURT: No, listen.

14 MS. LAMBERT: I'm listening. I'm sorry, I

15 missed the -- I missed the beginning.

16 THE COURT: It has to do with punishment. This

17 is punishment, okay?

18 MS. LAMBERT: Okay. So the letters were given

19 to him last Monday?

20 THE COURT: Monday.

21 MS. LAMBERT: And we've been talking about them

22 for four days? That would be considered reasonable notice.

23 THE COURT: When was notice given?

24 MR. JOHNSON: There was never notice given,

25 Judge, or they -- we were never given notice before trial. We

167

1 were given notice during the punishment phase.

2 MS. LAMBERT: You were given notice as soon as

3 we received the letters.

4 MR. JOHNSON: I'm sorry?

5 THE COURT: I understand that.

6 MR. BEACH: Last Friday -- last -- didn't you

7 tell them last Friday? Jennifer called Paul last Friday when

8 she found out about the letters.

9 MR. JOHNSON: We were told last Friday that

10 there were some letters, but we weren't told -- we obviously

11 didn't see the contents of the letters until --

12 MR. BEACH: Monday.

13 MR. JOHNSON: -- until during the punishment

14 phase.

15 THE COURT: So Monday is when you actually saw

16 them?

17 MR. BEACH: Saw them.

18 MR. JOHNSON: Yes.

19 MS. BENNETT: The same day the State saw them,

20 we -- yes.

21 THE COURT: I understand that, but --

22 MS. LAMBERT: Okay, Judge, the case law says

23 that they're not required to receive notice of rebuttal

24 evidence.

25 THE COURT: It's not rebuttal evidence. It's

168

1 punishment evidence.

2 MS. LAMBERT: We're rebutting the --

3 MR. JOHNSON: What are you rebutting? We

4 haven't offered any future danger testimony.

5 THE COURT: It's punishment evidence. Just --

6 I'm reading the section -- the code section that this is under

7 is under punishment.

8 MS. LAMBERT: So the objection is that you

9 didn't receive adequate notice, or what's your objection?

10 MR. JOHNSON: Number one, we didn't receive

11 adequate notice, and, number two, we haven't offered any future

12 dangerous testimony. How can you say you're offering rebuttal

13 testimony, when we haven't offered any?

14 (Discussion off the record between counsel.)

15 THE COURT: Okay. And just -- just for the

16 record, too, just so we know exactly where we are, I want to

17 point out Section 37.071, Section 2, the introduction of

18 evidence of extraneous conduct is governed by the notice

19 requirements of Section 3(g), Article 37.07. Just so we know

20 that -- where -- where we are. And this is -- this is

21 specifically talking about being found -- after being found

22 guilty, so the punishment stage. Doesn't say anything about

23 rebuttal. It just says the punishment stage.

24 So here's my question. If notice of something

25 has not been given until after the punishment stage is begun --

169

1 MS. LAMBERT: Well, we got -- you had -- Friday

2 is when we gave it to them?

3 MR. JOHNSON: We were given it Monday.

4 MR. BEACH: Before the punishment started.

5 MS. LAMBERT: Right. And you were notified on

6 Friday --

7 MR. JOHNSON: We were notified of the existence

8 of the letters --

9 MS. LAMBERT: -- of the existence of the

10 letters, and then you were given the letters on Monday when we

11 actually received them, correct?

12 MR. JOHNSON: Correct.

13 THE COURT: Follow me.

14 MS. LAMBERT: I'm with you, Judge.

15 THE COURT: Okay. Trial starts. Verdict of

16 guilt is returned. After the verdict of guilt is returned, but

17 before evidence is presented in the punishment phase, notice is

18 given to the Defense of evidence that they wish to bring up

19 during the punishment phase.

20 We're all in agreement that 404(b) talks about

21 case in chief, but the question is the punishment phase. It

22 doesn't talk about rebuttal in the State's case or even the

23 State's portion. It just says evidence of bad acts shall be --

24 the Defense shall be given notice prior to its introduction.

25 That's 37.07(g) as referenced by 37.071, Section 2.

170

1 MS. SMITH: Okay. So what's your argument about

2 why it's unreasonable?

3 MR. JOHNSON: It's not timely.

4 MS. SMITH: Well, it's timely in the sense that

5 we gave it over as soon as we had it, so how does it --

6 MR. LAMBERT: And you have to show surprise,

7 which obviously you're not surprised because we've been talking

8 about it for four days.

9 MR. JOHNSON: I was -- I was surprised.

10 MS. SMITH: Well, how are you prejudiced?

11 You've had time to find a way to respond to them. You've had

12 plenty of time to come up with this argument, try to exclude

13 it. Show me how you're prejudiced. Just so it might come in

14 doesn't mean you're prejudiced, too, by the way.

15 MR. JOHNSON: Well, Judge, there's such a

16 remoteness to the language. It has no probative value as to

17 the special issues.

18 MS. LAMBERT: Oh, so now it's 403?

19 MR. JOHNSON: Well, it's 403, it's 404.

20 THE COURT: No, we're not going to argue 403

21 right now. I'm more concerned about this.

22 MS. LAMBERT: The notice?

23 THE COURT: Yes.

24 MS. SMITH: Okay. Well, it doesn't give a

25 number, doesn't tell us -- it just says timely, right, or

171

1 reasonable?

2 MS. LAMBERT: Reasonable. And case law doesn't

3 put a number on what reasonable is. And considering the fact

4 that he was told as soon as we knew and the fact that we've

5 been talking about it for four days and he's still -- has never

6 raised this argument until right now, I don't see how he can

7 complain that he wasn't reasonably notified.

8 MR. JOHNSON: Well, Judge, as I just -- as I

9 stated a moment ago in regards to my due process argument, the

10 fact --

11 MS. LAMBERT: So now it's due process?

12 MR. JOHNSON: That's what I objected to a moment

13 ago.

14 MS. LAMBERT: Okay.

15 MR. JOHNSON: And the -- we're claiming that --

16 that it's -- it's unfair at this time to allow the admission of

17 this evidence because as I said a moment ago, we were not

18 allowed to have this information prior to trial and prior to

19 the formulation of our defensive strategy and prior to the

20 formulation in the consultations with our expert witnesses and

21 had we, in fact, had this information, then we may have changed

22 our whole strategy in how to try the case.

23 MS. LAMBERT: Your expert witnesses reviewed the

24 letters today.

25 MR. JOHNSON: Our expert witnesses had

172

1 formulated their opinions prior to coming to the courtroom.

2 MS. LAMBERT: And changed them when they were

3 here, so they could have taken this information and used it to

4 form the basis of their expert opinion.

5 MR. JOHNSON: But we don't have an

6 opportunity to change the formulation of our strategy to

7 proceed with the whole trial.

8 MS. LAMBERT: You could have done so on Friday

9 or on Monday.

10 MR. JOHNSON: That's a little bit --

11 THE COURT: Don't -- don't say Friday. It was

12 Monday. For the record, it's Monday.

13 MS. SMITH: But punishment still hadn't started.

14 MR. JOHNSON: Well, I'm talking about --

15 THE COURT: I understand that, but I don't want

16 the record to be confused as to what my opinion of when they

17 received notice.

18 MS. LAMBERT: I got it.

19 THE COURT: So I don't want to -- don't -- I

20 just want it to be clear that the Court believes it was -- it

21 was Monday morning prior to punishment beginning, but it was

22 still Monday, not Friday.

23 MR. JOHNSON: So that's the nature of our --

24 that's the nature of our objections, Judge. We feel -- and

25 it's strictly within the discretion of the Court. And this is

1 a capital crime. And certainly -- the Court can certainly
 2 err -- err on the side of caution in order to protect the
 3 constitutional rights of the Defendant.
 4 THE COURT: All right. The Court makes the
 5 following finding -- the Court finds -- the Court finds that
 6 the State did not discover the -- the letters until the Friday
 7 prior to the beginning of -- of punishment. The Court finds
 8 that the State at that time gave notice to the Defense of their
 9 intent to introduce these records as bad acts and included
 10 within that the name of -- of all of the parties and all
 11 identifying information and turned over these letters to the
 12 Defense on Monday prior to the beginning of -- of punishment.
 13 The Court finds that introduction of them now at
 14 this time satisfies the timely notice requirement to which the
 15 Defense has excepted. The exception is noted.
 16 Now, next argument. Content. Content
 17 objections?
 18 MR. JOHNSON: Judge, we're just going to object
 19 to the content of the letters is -- the -- of the information
 20 contained in the letters is at least 20 years ago. It's --
 21 it's too remote, has no bearing on the issue as to the future
 22 dangerousness issue of the Defendant or in regards to
 23 mitigation as he sits in this courtroom today.
 24 THE COURT: What says the State?
 25 MS. SMITH: I'm sorry, I did not hear what you

1 just said, Paul. We were busy.
 2 MR. BEACH: Let me try to handle this.
 3 MS. SMITH: Okay.
 4 MR. BEACH: I don't know how many times we've
 5 heard in the last day and half that the Defendant has been
 6 mentally ill his entire life. Well, his entire life includes
 7 when he was in the penitentiary writing letters to his ex-high
 8 school girlfriend about, you know, how he made choices and he
 9 was sane and it wasn't for the money, it was for the thrill of
 10 getting away from it. So that -- that's -- that goes to his
 11 antisocial personality versus his mental illness, and they've
 12 opened all that up for our ability to rebut it with these
 13 letters.
 14 THE COURT: And which -- and what -- what do you
 15 want to introduce?
 16 MR. BEACH: Those two excerpts that I read,
 17 Judge, into the record.
 18 THE COURT: And how do you -- how do you
 19 propose -- how do you all -- okay, I'm going to rule that those
 20 are admissible over Defense's objection which is timely made.
 21 Now, how are we going to get it in?
 22 MR. BEACH: I would suggest to read it.
 23 THE COURT: You're not waiving anything by --
 24 you're not waiving anything by coming to an agreement on how
 25 it's delivered.

1 MR. JOHNSON: No, I understand. And, Judge, the
 2 only problem -- the only problem with reading it again is I
 3 don't have an objection to Mr. Beach reading it if there's
 4 absolutely no inflection and if he reads it in the same manner
 5 in which it's written, because there were -- several words were
 6 misspelled. They need to be read phonetically and not what his
 7 assumption of the wording -- or the letters are supposed to be.
 8 MR. BEACH: I can do that.
 9 MR. JOHNSON: And with absolutely no inflection,
 10 and so I don't have a problem with him doing it in that regard.
 11 And we -- absolutely, it's imperative that since this is going
 12 to be read to the jury, it would be considered an exhibit that
 13 -- that they bring a -- in some fashion they have these things
 14 bracketed on a separate exhibit so that the jury is not allowed
 15 to even inadvertently see the remaining portions of those
 16 letters.
 17 THE COURT: Is that -- does the State agree to
 18 that stipulation?
 19 MR. BEACH: Yes, sir.
 20 THE COURT: All right. Then that's -- that's
 21 how we will proceed.
 22 MR. JOHNSON: And just out of an abundance of
 23 caution, Judge, at this time all of these letters -- and I know
 24 Ms. LaBar is very good at what she does. There's -- there's
 25 been several exhibits in the trial so far that have been

1 admitted for record purposes only, and we just want to reurge
 2 the Court and the reporter to exercise extreme caution and make
 3 sure that the jury is not given any access to any of the
 4 exhibits that have been introduced for record purposes only.
 5 THE COURT: All the hand -- the handwritten
 6 letters to the girlfriend of which the State gave notice of on
 7 -- on Monday, those are admitted for record purposes. Now, the
 8 other letters, it's my understanding, were admitted for all
 9 purposes.
 10 MR. BEACH: That's correct.
 11 MR. JOHNSON: That's correct.
 12 THE COURT: And we've had a conversation.
 13 MR. JOHNSON: They were -- they were included in
 14 the business record affidavits.
 15 THE COURT: Okay. Right. Then we're --
 16 we're -- in agreement.
 17 MS. LAMBERT: Judge, did -- did you get --
 18 regarding closing argument?
 19 THE COURT: Did I get what? Yeah, I looked. I
 20 know that. I know that section. That's not 37.071. Go get
 21 the jury.
 22 MS. BENNETT: Yeah, we'll do it after. You
 23 found a case on point.
 24 Lisa did.
 25 (Discussion off the record.)

1 THE BAILIFF: All rise.
 2 (Jury returned to courtroom.)
 3 THE COURT: Thank you all. Please be seated.
 4 Defense.
 5 MR. JOHNSON: Your Honor, ladies and gentlemen,
 6 Defense is going to rest.
 7 THE COURT: State?
 8 MR. BEACH: The State at this time would offer
 9 into evidence two excerpts from a letter written by the
 10 Defendant to Jennifer Alcorn while he was in the penitentiary,
 11 those being State's Exhibits 148A, that's already been
 12 published to the jury about the college, and now State's 148B.
 13 (State's Exhibits 148A and 148B offered.)
 14 THE COURT: Please proceed.
 15 MR. JOHNSON: Your Honor, if the Court would
 16 note our previous objection.
 17 THE COURT: Previous objection is noted.
 18 MR. BEACH: And are they admitted?
 19 THE COURT: They're admitted.
 20 (State's Exhibits 148A and 148B admitted.)
 21 MR. BEACH: That I know that's all behind us
 22 now. Jennifer, when we first came as one, I said if you ever
 23 blank, blank, blank, blank over, and think you can play with my
 24 feeling, I'll kill you. Isn't that what I said, question mark,
 25 question mark, question mark. You see, you and nobody else can

1 just turn on my feelings and turn them off when you get ready.
 2 I'm not make out of that can of material.
 3 I have associated with people on both sides of
 4 the laws. I just choose to go the wrong way. Me doing the
 5 wrong thing that placed me here, it wasn't the money mostly, it
 6 was the high of done wrong and getting away with it. I wasn't
 7 on drugs or alcohol. Like to think I was completely sane at
 8 that time. You see I know what it takes to make and be a
 9 success, but this place at this time is the best place for me.
 10 Understand what I'm talking about first before you make a judge
 11 of my sanity. When I was out, my people will tell you if I
 12 wasn't incarcerated at the time of the summer of 1990, I would
 13 have killed up a lot of people or been killed. Really because
 14 I was gone, I really was living for day-to-day, not caring
 15 about life and people.
 16 The State rests.:
 17 (State Rests.)
 18 THE COURT: Defense rest?
 19 MR. JOHNSON: Close.
 20 (Defense Closes.)
 21 THE COURT: Close?
 22 MR. BEACH: Close.
 23 (State Closes.)
 24 THE COURT: Ladies and gentlemen, you've heard
 25 all the evidence you're going to hear in this case. We are

1 going to reconvene tomorrow morning at 10:00 a.m., at which
 2 time you will hear arguments from counsel. The -- I don't know
 3 what that's going to be yet, but you will find out then. Do
 4 not start making up your mind until you've been given what's
 5 called the charge of the Court. Just like in the first stage
 6 of this case, you will get jury instructions on how to proceed
 7 and what you are to look at and how to proceed. You cannot
 8 make your decision as to what you think should happen until
 9 then. You can't discuss it amongst yourselves until you have
 10 been so told to do so by the Courts. So until tomorrow
 11 morning, we will read the charge at 10:00 a.m., each side will
 12 have a chance to -- to make an argument, and then we will let
 13 you make up your mind then.
 14 Lunch will be provided to you tomorrow. It will
 15 be delivered here. You'll get a chance to order it and things
 16 like that. So until tomorrow morning, 10 o'clock. Jury --
 17 MR. JOHNSON: Judge, we need to approach about a
 18 matter. Could we have the jury remain in the jury room until
 19 the bailiff excuses them?
 20 THE COURT: In the jury room, yes, you may.
 21 (Jury excused from courtroom.)
 22 (Discussion off the record.)
 23 THE COURT: Bring them in. Bring them in.
 24 (Jury returned to courtroom.)
 25 THE COURT: Thank you all. Please be seated.

1 Ladies and gentlemen, one other -- one other
 2 thing, and this is -- this is important. Again, this is book
 3 stuff. That -- I'm going to ask that you all pack a bag
 4 tonight, okay? Going to have to be couple days worth -- worth
 5 of clothes, just -- just to make sure. Because once we start
 6 the deliberation process, you all are going to be stuck. And
 7 that's a good thing. It really is. I know you're not -- you
 8 don't like it, but it's -- it's part of the process. It's part
 9 of how things work, just to make sure that the decision is not
 10 tainted, make sure the decision is not rushed, that you simply
 11 race at the end of the day and go, oh, boy, it's 4:15, we
 12 better make a decision. You can't do that in this case.
 13 You all know how important this is, so pack a
 14 bag tomorrow. Don't know if it's going to be needed or not,
 15 but make sure to pack a bag. I know one person has -- has
 16 airport duty. Try to make other arrangements, if that can be
 17 done ahead of time rather than at the last minute. Like I
 18 said, just in an abundance of caution, I don't want you to rush
 19 through your decisions. I want them to be made according to
 20 the rules so that we don't have to do this again. But one of
 21 the things is that you will be required to stay together.
 22 Yes, sir?
 23 JUROR: Should we bring our things in the
 24 morning or leave them --
 25 THE COURT: You can always bring them in. We've

1 got a safe location -- a lot safer in here in my office than
2 they are in your car, so I would say go ahead and bring -- and
3 bring them in. And if you get stopped by security and they say
4 you're not allowed to bring something in, you -- we will --
5 we'll come downstairs and make sure that it gets brought in.
6 You tell them just talk -- talk to Judge Chatham, and he told
7 me to bring this, okay? So we'll make sure that that gets --
8 gets brought in.

9 So, ladies and gentlemen, until tomorrow.

10 (Jury excused from courtroom.)

11 (Recess of proceedings.)
